

Paired benchmark overview

Matched completed questions: 1810

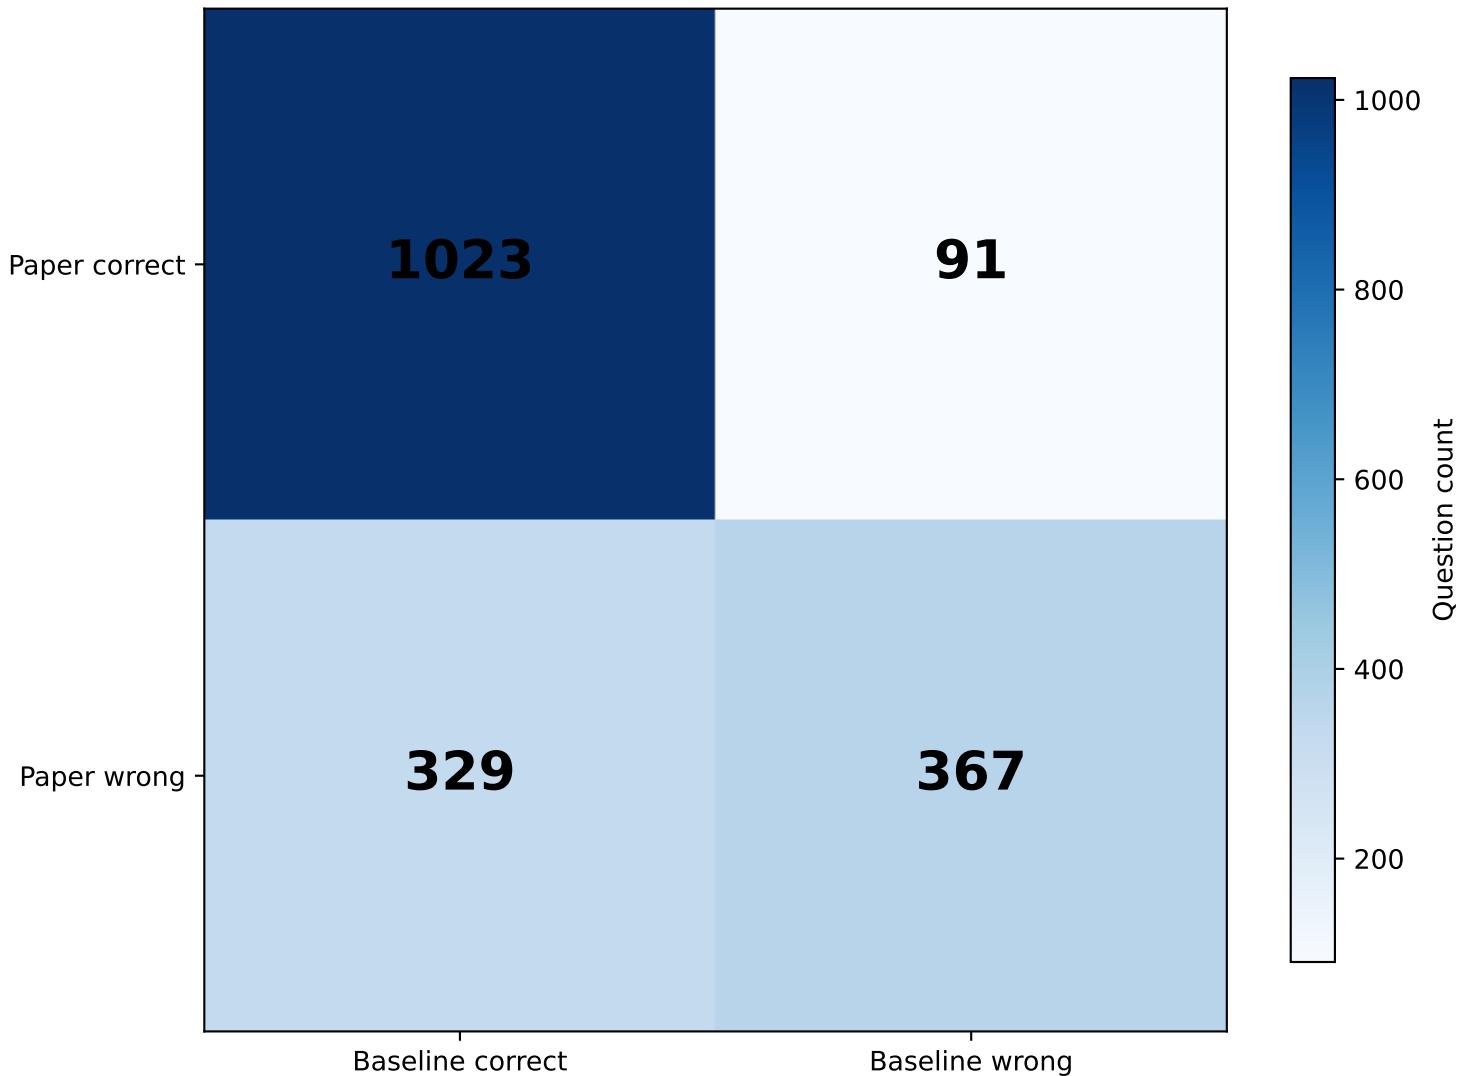

Paper offline: 1114/1810 (61.5%)

Paper baseline GSMA Rel-18: 1352/1810 (74.7%)

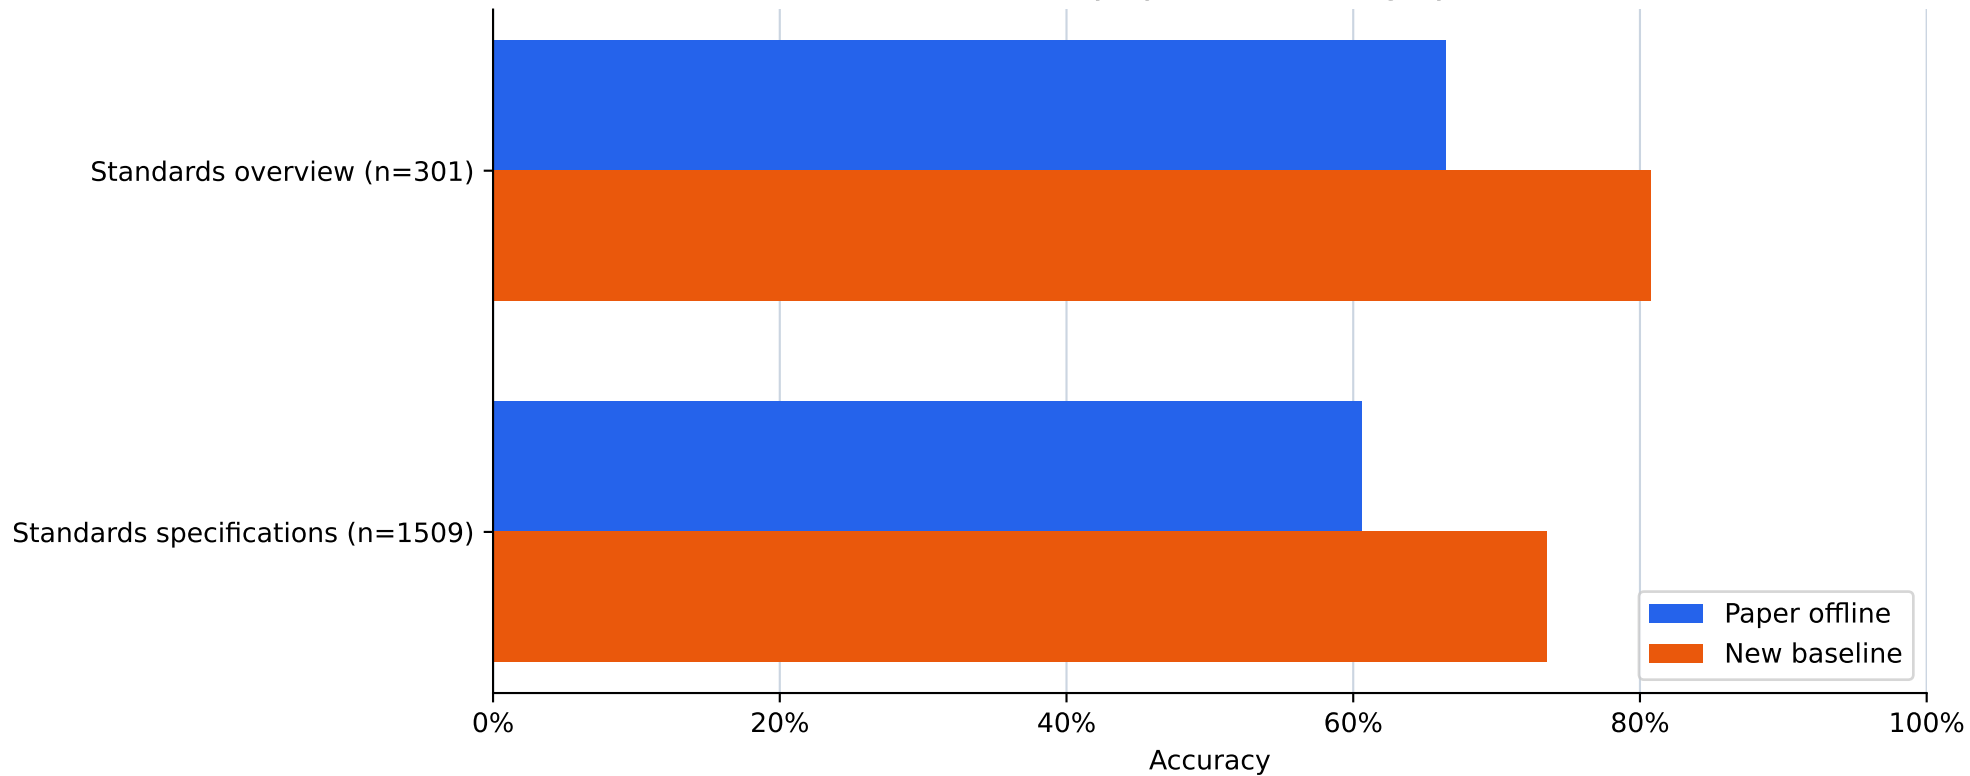

Circle areas are illustrative; labels are exact counts of correct-answer sets.

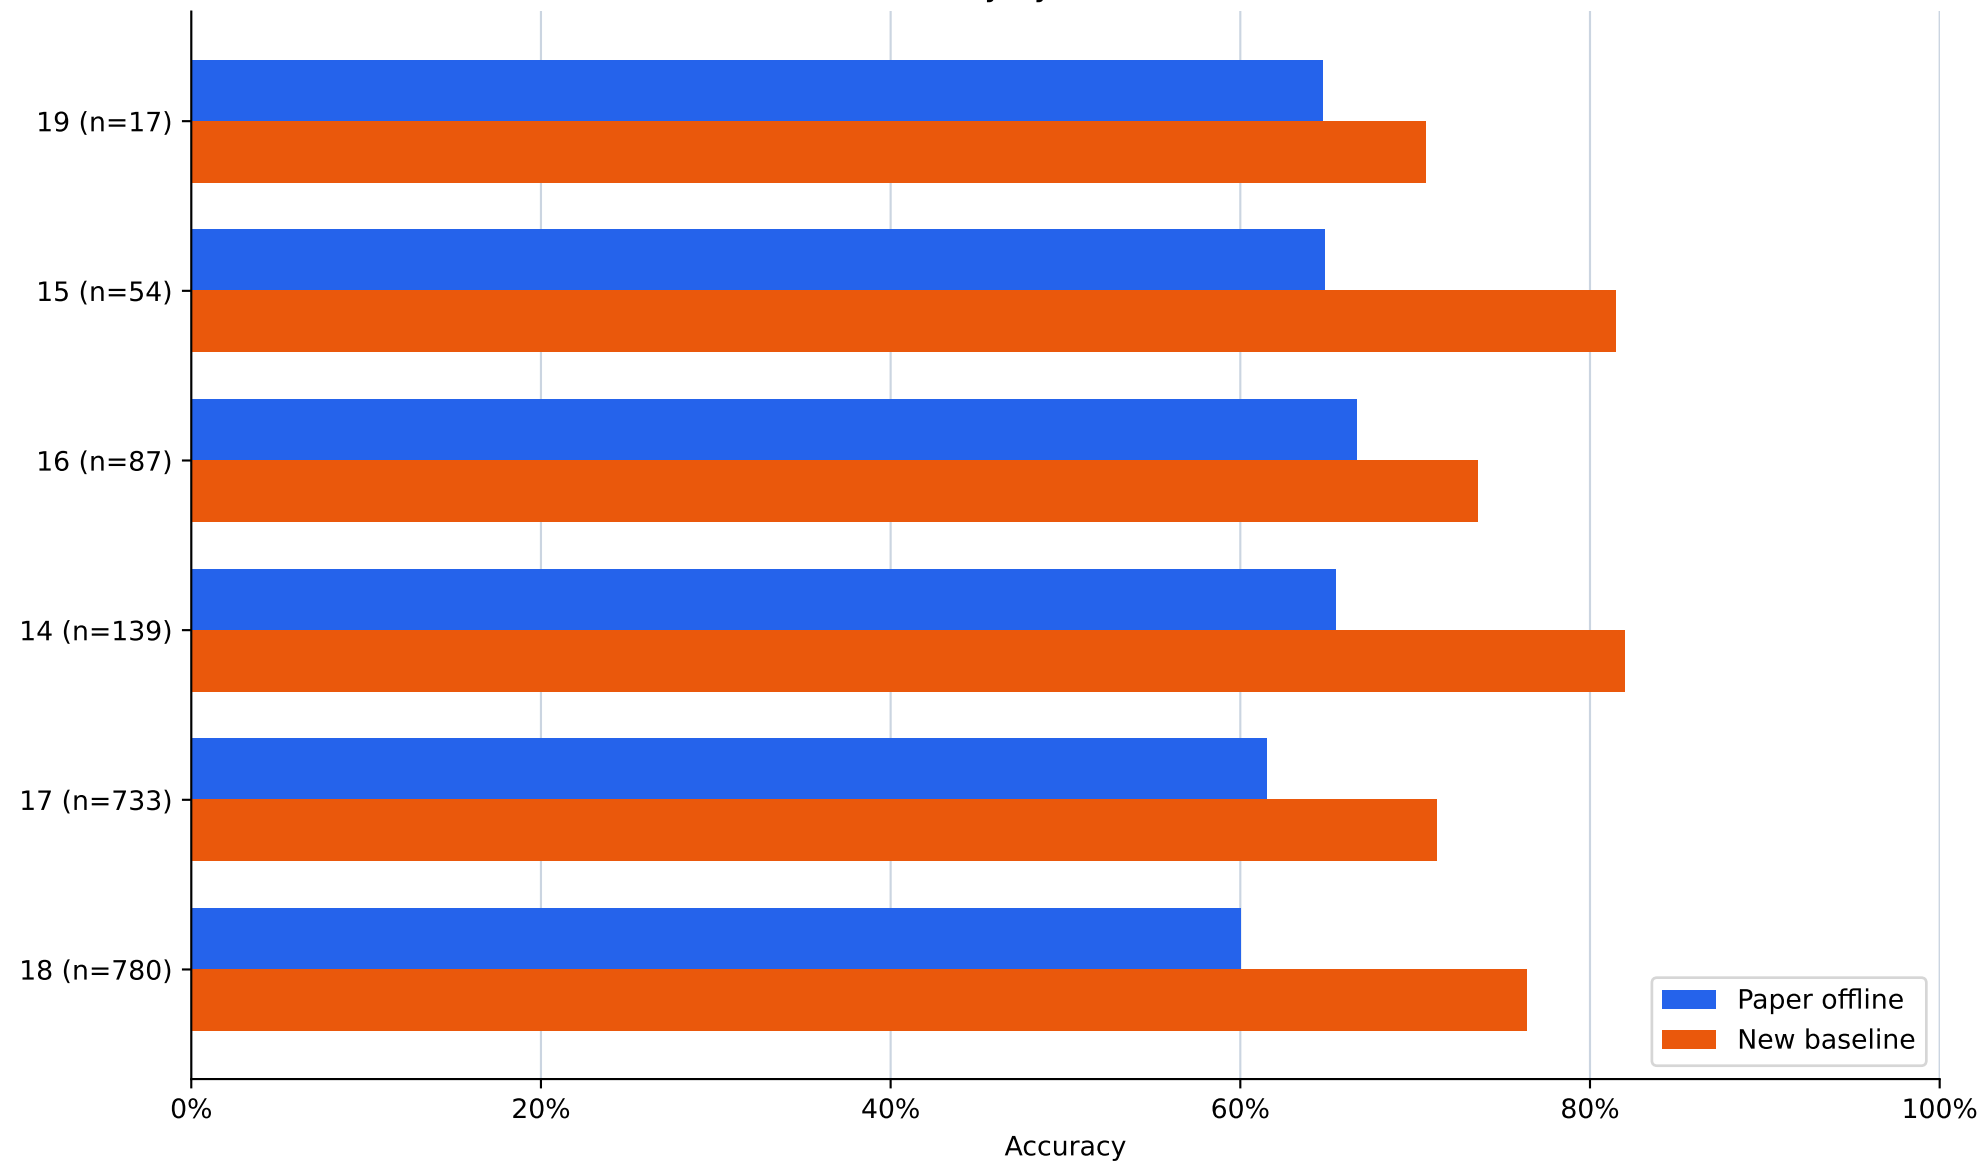

Paired correctness matrix

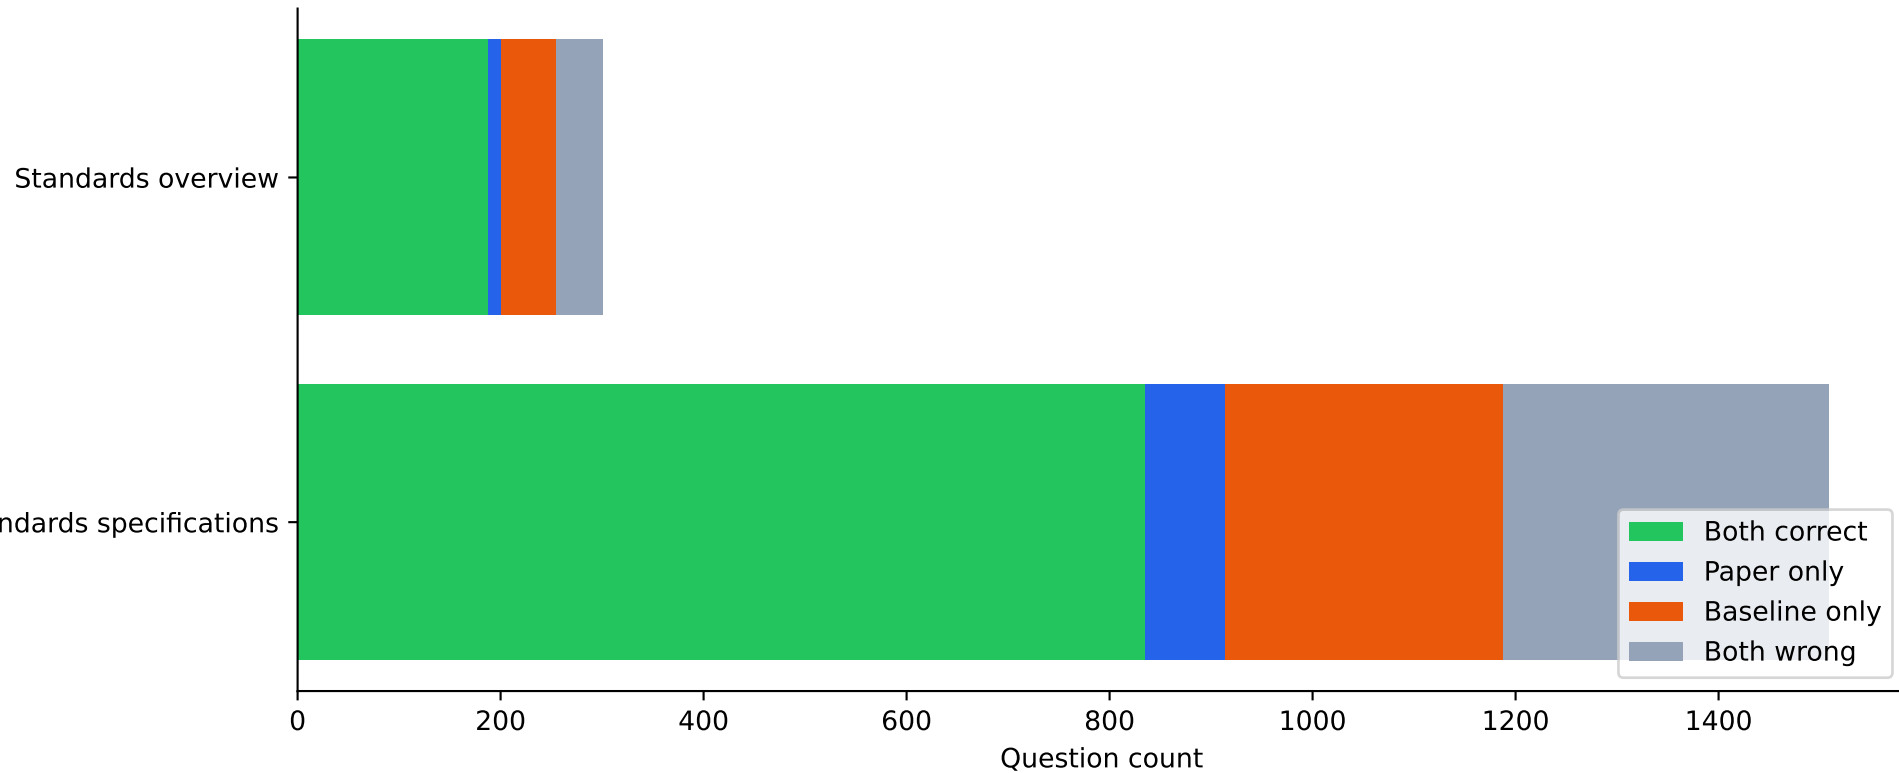

Accuracy by TeleQnA category

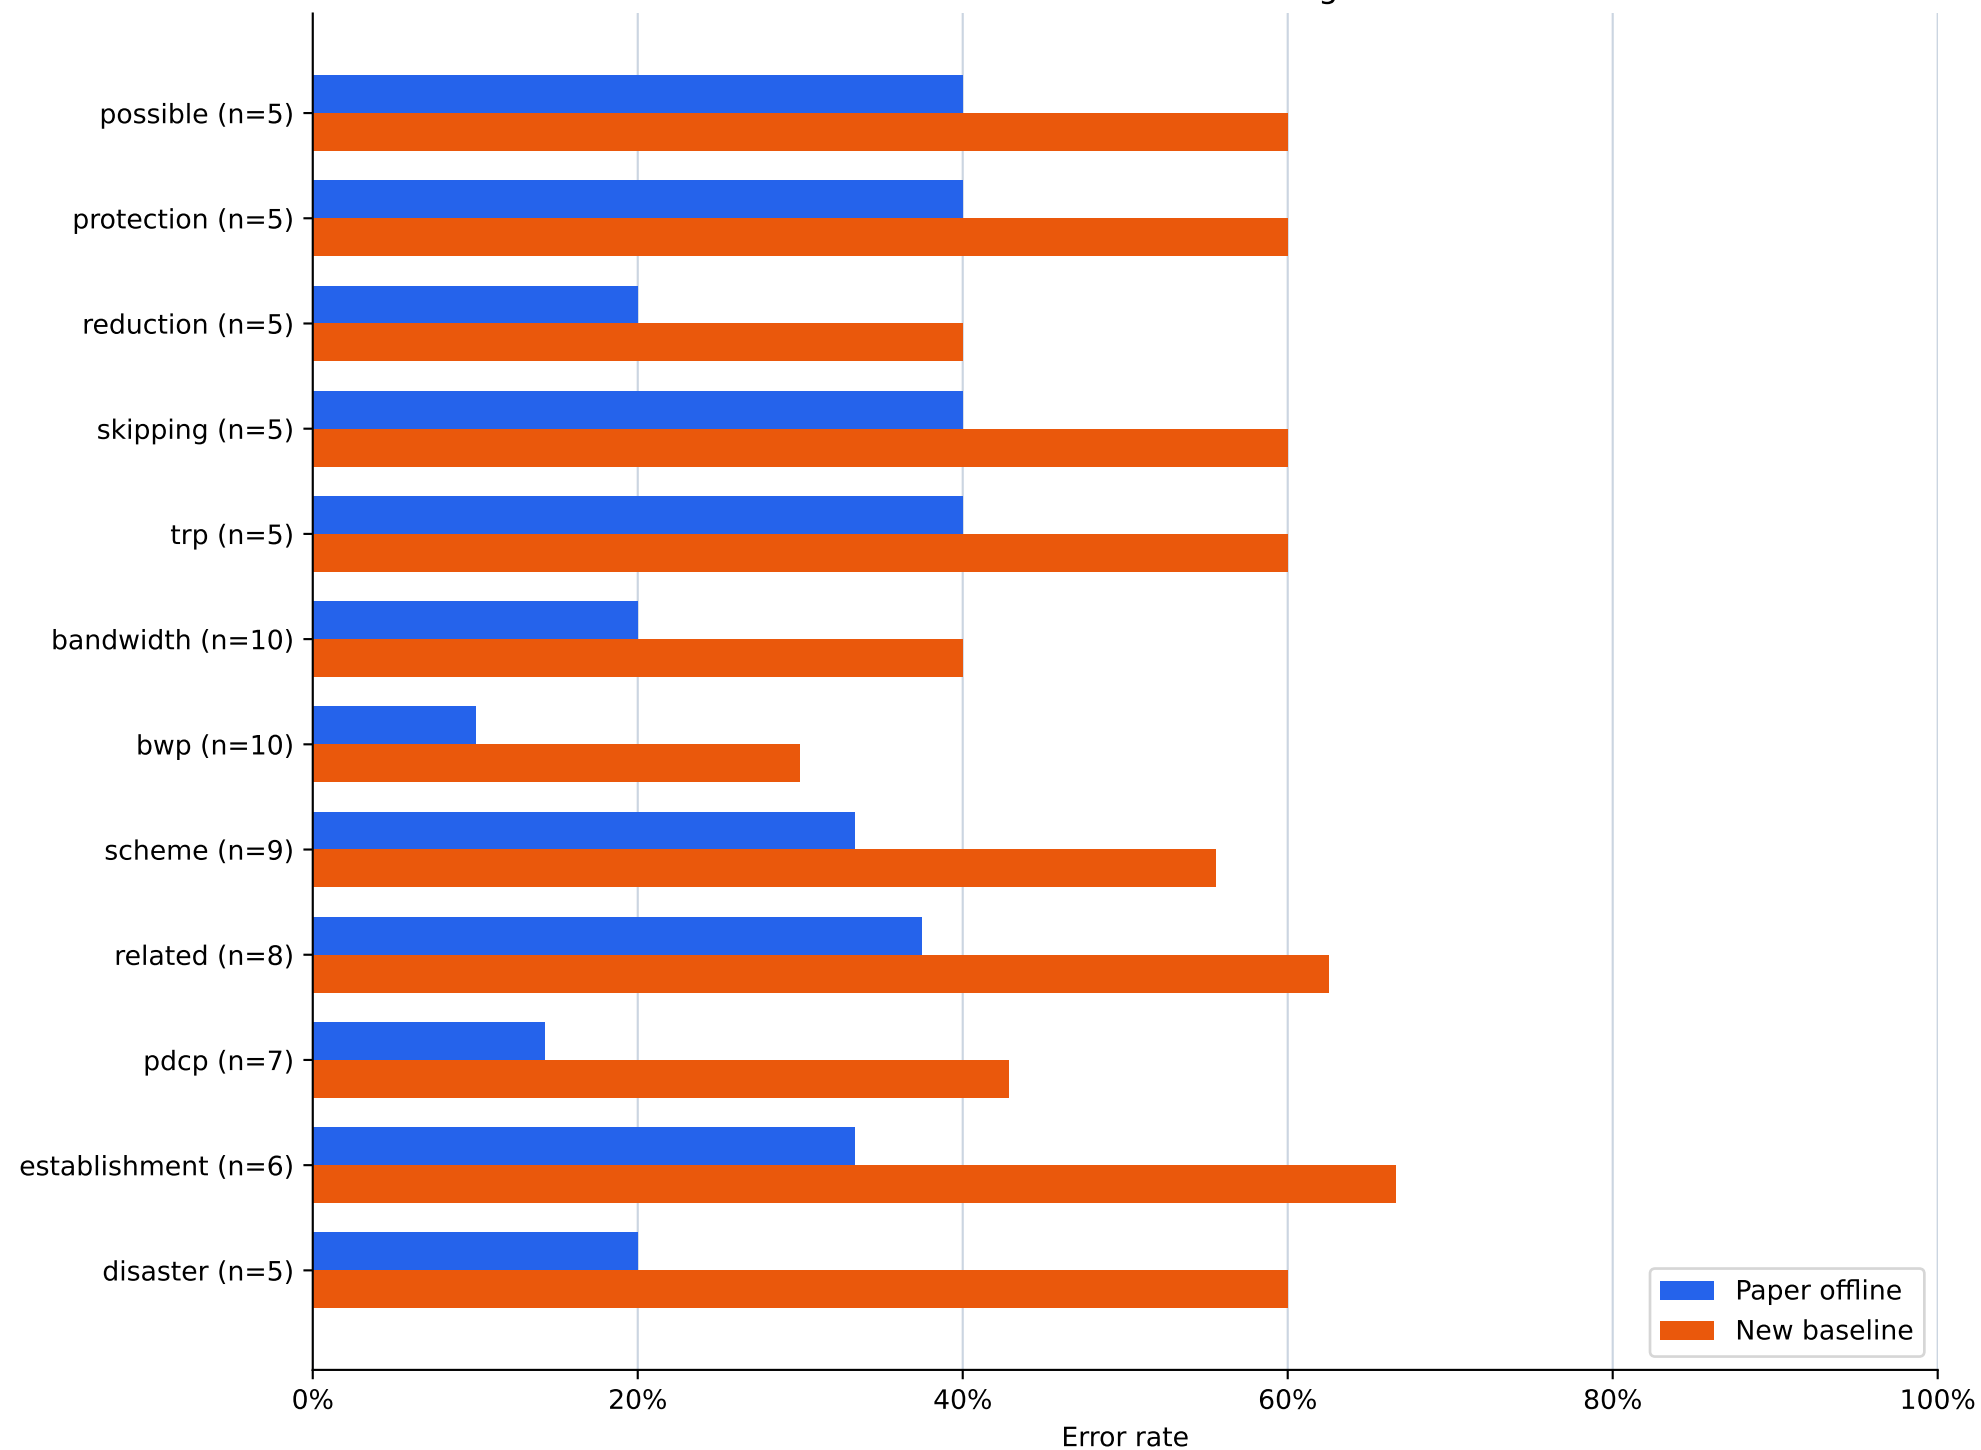

Accuracy by 3GPP release

Where each run succeeds or fails, by category

Terms where the new baseline has a higher error rate

Exploratory grouping by literal question terms; each term occurs in at least 5 questions. Small n is not a causal finding.

Questions Paper offline gets right and Paper baseline GSMA Rel-18 misses (1-8 of 91)

question 548 | Rel-18 | Standards specifications

Q: For FR2-2 measurement system, what is the minimum channel bandwidth required for modelling multi-path fading in single carrier ...

Expected: option 1 | paper: Option 1 | baseline: option 2

question 564 | Rel-16 | Standards overview

Q: What are the management aspects addressed by the OAM_LTE_WLAN work item? [3GPP Release 16]

Expected: option 3 | paper: Option 3 | baseline: option 2

question 669 | Rel-17 | Standards specifications

Q: What does a RedCap UE expect if it monitors PDCCH according to Type1-PDCCH CSS set and does not monitor PDCCH according to Type2-PDCCH ...

Expected: option 2 | paper: Option 2 | baseline: option 1

question 716 | Rel-16 | Standards overview

Q: What is the purpose of the ePWS feature? [3GPP Release 16]

Expected: option 1 | paper: Option 1 | baseline: option 4

question 773 | Rel-17 | Standards specifications

Q: What should the UE do when checking access Class or ACDC category related cell access restrictions during RRC connection establishment ...

Expected: option 4 | paper: Option 4 | baseline: option 1

question 1054 | Rel-18 | Standards specifications

Q: What determines the allowed network exposure information for the UE? [3GPP Release 18]

Expected: option 5 | paper: Option 5 | baseline: option 2

question 1096 | Rel-18 | Standards specifications

Q: In which scenarios does the consumer NF determine new QoS parameters? [3GPP Release 18]

Expected: option 3 | paper: Option 3 | baseline: option 5

question 1123 | Rel-18 | Standards specifications

Q: What is the purpose of integrity protection in NR connected to 5GC security? [3GPP Release 18]

Expected: option 4 | paper: Option 4 | baseline: option 2

Questions Paper offline gets right and Paper baseline GSMA Rel-18 misses (9-16 of 91)

question 1143 | Rel-18 | Standards specifications

Q: What is the key characteristic of a roaming broker enabled Home Environment? [3GPP Release 18]

Expected: option 5 | paper: Option 5 | baseline: option 2

question 1241 | Rel-17 | Standards specifications

Q: What does a '1' value for a bit in the TRS availability indication field indicate? [3GPP Release 17]

Expected: option 5 | paper: Option 5 | baseline: option 1

question 1287 | Rel-17 | Standards specifications

Q: Which message contains the low layer configuration for the UE? [3GPP Release 17]

Expected: option 5 | paper: Option 5 | baseline: option 3

question 1361 | Rel-17 | Standards specifications

Q: What is the cyclic-prefix length for normal cyclic prefix in SC-FDMA? [3GPP Release 17]

Expected: option 2 | paper: Option 2 | baseline: option 1

question 1383 | Rel-17 | Standards specifications

Q: How are the metrics related to the provided thresholds evaluated for WLAN BSS? [3GPP Release 17]

Expected: option 2 | paper: Option 2 | baseline: option 3

question 1387 | Rel-18 | Standards specifications

Q: When does the NG-RAN initiate the Connection Inactive procedure with CN based MT communication handling? [3GPP Release 18]

Expected: option 2 | paper: Option 2 | baseline: option 1

question 1532 | Rel-18 | Standards specifications

Q: What reference point enables interactions between the EES and the EEC? [3GPP Release 18]

Expected: option 1 | paper: Option 1 | baseline: option 2

question 1538 | Rel-18 | Standards specifications

Q: What is the definition of OTA sensitivity? [3GPP Release 18]

Expected: option 5 | paper: Option 5 | baseline: option 2

Questions Paper offline gets right and Paper baseline GSMA Rel-18 misses (17-24 of 91)

question 1708 | Rel-17 | Standards specifications

Q: What is the purpose of the Caller Identity Verification Results Delivery to the User? [3GPP Release 17]

Expected: option 1 | paper: Option 1 | baseline: option 3

question 1787 | Rel-17 | Standards specifications

Q: Which message is generated by the gNB-CU to transition the UE from RRC connected to RRC inactive? [3GPP Release 17]

Expected: option 3 | paper: Option 3 | baseline: option 4

question 1956 | Rel-17 | Standards specifications

Q: How many subframes are there in half-frame 0? [3GPP Release 17]

Expected: option 1 | paper: Option 1 | baseline: option 4

question 1963 | Rel-18 | Standards specifications

Q: What does the NWDAF collect from the UPF or the AF related to user data congestion analytics? [3GPP Release 18]

Expected: option 3 | paper: Option 3 | baseline: option 2

question 2079 | Rel-18 | Standards specifications

Q: Which connectivity model requires URSP rules for steering the mapping between UE applications and PDU Sessions? [3GPP Release 18]

Expected: option 3 | paper: Option 3 | baseline: option 2

question 2474 | Rel-17 | Standards overview

Q: In supporting an MA PDU Session, what does Rel-17 enable in terms of 3GPP access over EPC? [3GPP Release 17]

Expected: option 2 | paper: Option 2 | baseline: option 1

question 2493 | Rel-14 | Standards overview

Q: What is EC-GSM-IoT? [3GPP Release 14]

Expected: option 1 | paper: Option 1 | baseline: option 3

question 2638 | Rel-16 | Standards overview

Q: What does the feature Scheduling of multiple DL/UL transport blocks with single DCI allow? [3GPP Release 16]

Expected: option 5 | paper: Option 5 | baseline: option 2

Questions Paper offline gets right and Paper baseline GSMA Rel-18 misses (25-32 of 91)

question 2821 | Rel-17 | Standards specifications

Q: What architectural or protocol changes are expected to have minimum impact on the 5G system? [3GPP Release 17]

Expected: option 1 | paper: Option 1 | baseline: option 4

question 3117 | Rel-18 | Standards specifications

Q: When does the need for NG-RAN to continue reporting the UE's location cease? [3GPP Release 18]

Expected: option 1 | paper: Option 1 | baseline: option 2

question 3377 | Rel-18 | Standards specifications

Q: Under high network load conditions, how does the network protect itself? [3GPP Release 18]

Expected: option 1 | paper: Option 1 | baseline: option 4

question 3570 | Rel-17 | Standards specifications

Q: What is the duration of radio frame structure type 1? [3GPP Release 17]

Expected: option 2 | paper: Option 2 | baseline: option 1

question 3571 | Rel-18 | Standards specifications

Q: Which SAN classes are defined for SAN type 1-O and SAN type 1-H? [3GPP Release 18]

Expected: option 1 | paper: Option 1 | baseline: option 3

question 3586 | Rel-17 | Standards overview

Q: Which documents specify the information to be pre-configured or stored in USIM for Disaster Roaming service? [3GPP Release 17]

Expected: option 1 | paper: Option 1 | baseline: option 5

question 3605 | Rel-18 | Standards specifications

Q: What is the relative increase in free space path loss from 43.5 GHz to 71 GHz? [3GPP Release 18]

Expected: option 4 | paper: Option 4 | baseline: option 3

question 3649 | Rel-18 | Standards specifications

Q: What does the UPF do in response to the N4 Session Establishment request from the SMF? [3GPP Release 18]

Expected: option 2 | paper: Option 2 | baseline: option 3

Questions Paper offline gets right and Paper baseline GSMA Rel-18 misses (33-40 of 91)

question 3693 | Rel-17 | Standards specifications

Q: What is the requirement for interruption time during handover of RT and NRT services in the Evolved Packet System? [3GPP Release 17]

Expected: option 2 | paper: Option 2 | baseline: option 3

question 3887 | Rel-17 | Standards specifications

Q: What does the dispatchable location accuracy refer to? [3GPP Release 17]

Expected: option 3 | paper: Option 3 | baseline: option 1

question 3917 | Rel-17 | Standards specifications

Q: What are the fundamental characteristics for QoS in the Streaming class? [3GPP Release 17]

Expected: option 1 | paper: Option 1 | baseline: option 2

question 3928 | Rel-17 | Standards specifications

Q: What does the UE do if it is unable to comply with any part of the configuration included in the MobilityFromNRCommand message? [3GPP ...

Expected: option 1 | paper: Option 1 | baseline: option 4

question 3988 | Rel-18 | Standards specifications

Q: What is the minimum value of the uniformly distributed variables used for UMa and UMi-Street Canyon? [3GPP Release 18]

Expected: option 1 | paper: Option 1 | baseline: option 2

question 4132 | Rel-18 | Standards specifications

Q: What is the granularity of the time reference provided by the network to end user equipment in LTE? [3GPP Release 18]

Expected: option 1 | paper: Option 1 | baseline: option 3

question 4250 | Rel-18 | Standards specifications

Q: What is the purpose of classifying UEs as fixed, camper or traveller? [3GPP Release 18]

Expected: option 3 | paper: Option 3 | baseline: option 5

question 4399 | Rel-18 | Standards specifications

Q: What is the purpose of the SMF in a 5G VN group? [3GPP Release 18]

Expected: option 3 | paper: Option 3 | baseline: option 4

Questions Paper offline gets right and Paper baseline GSMA Rel-18 misses (41-48 of 91)

question 4418 | Rel-17 | Standards specifications
Q: What is the purpose of an eRG in a CPN? [3GPP Release 17]
Expected: option 1 | paper: Option 1 | baseline: option 4

question 4451 | Rel-18 | Standards specifications
Q: What happens when there are no more data packets to be forwarded for an E-RAB in indirect data forwarding from EPS to 5GS? [3GPP Release ...]
Expected: option 5 | paper: Option 5 | baseline: option 1

question 4511 | Rel-17 | Standards specifications
Q: What information does the MSC retrieve from another MSC/VLR or the UE? [3GPP Release 17]
Expected: option 5 | paper: Option 5 | baseline: option 3

question 4666 | Rel-18 | Standards specifications
Q: What does the NWDAF provide to the consumer in PFD Determination analytics? [3GPP Release 18]
Expected: option 2 | paper: Option 2 | baseline: option 4

question 4669 | Rel-18 | Standards specifications
Q: What does the DCCF do when a requested data is already being collected from a Data Source? [3GPP Release 18]
Expected: option 4 | paper: Option 4 | baseline: option 2

question 4755 | Rel-18 | Standards specifications
Q: What is the main function of the NWDAF with Federated Learning (FL) capability? [3GPP Release 18]
Expected: option 1 | paper: Option 1 | baseline: option 4

question 4784 | Rel-17 | Standards specifications
Q: What is the uplink transmission scheme used for FDD and TDD? [3GPP Release 17]
Expected: option 4 | paper: Option 4 | baseline: option 3

question 4837 | Rel-17 | Standards specifications
Q: Is it possible for more than one LCS client to activate requests for the same target UE? [3GPP Release 17]
Expected: option 5 | paper: Option 5 | baseline: option 2

Questions Paper offline gets right and Paper baseline GSMA Rel-18 misses (49-56 of 91)

question 5129 | Rel-18 | Standards specifications

Q: What is the purpose of steering of roaming for a multi-mode terminal? [3GPP Release 18]

Expected: option 3 | paper: Option 3 | baseline: option 5

question 5246 | Rel-14 | Standards specifications

Q: Which type of PRAs information is provisioned by the PCRF/OCS to the MME each time the IP-CAN session is established? [3GPP Release 14]

Expected: option 1 | paper: Option 1 | baseline: option 3

question 5320 | Rel-16 | Standards overview

Q: What are the physical layer signals used for RAT-dependent positioning solutions in NR? [3GPP Release 16]

Expected: option 2 | paper: Option 2 | baseline: option 1

question 5369 | Rel-17 | Standards specifications

Q: What are the key principles of user plane handling for inter-System data forwarding from 5GS to EPS? [3GPP Release 17]

Expected: option 3 | paper: Option 3 | baseline: option 1

question 5491 | Rel-17 | Standards specifications

Q: What capability should the 5G system provide for a UE to assist another UE in ranging of a third UE? [3GPP Release 17]

Expected: option 3 | paper: Option 3 | baseline: option 2

question 5551 | Rel-16 | Standards overview

Q: What is the size of a PDCP SDU in E-UTRA? [3GPP Release 16]

Expected: option 1 | paper: Option 1 | baseline: option 2

question 5819 | Rel-14 | Standards overview

Q: What is the maximum data channel bandwidth supported in CE modes A and B in DL? [3GPP Release 14]

Expected: option 4 | paper: Option 4 | baseline: option 2

question 5821 | Rel-18 | Standards specifications

Q: What is the minimum number of grid points required for the TRP Measurement Grid with constant density? [3GPP Release 18]

Expected: option 3 | paper: Option 3 | baseline: option 1

Questions Paper offline gets right and Paper baseline GSMA Rel-18 misses (57-64 of 91)

question 5915 | Rel-16 | Standards specifications

Q: How many SSB bursts are used for Loop convergence in the CONNECTED state? [3GPP Release 16]

Expected: option 2 | paper: Option 2 | baseline: unparsed

question 6233 | Rel-17 | Standards specifications

Q: What does a UE expect when receiving a DCI format with a BWP indicator field indicating an active UL BWP or DL BWP change? [3GPP Release ...]

Expected: option 1 | paper: Option 1 | baseline: option 3

question 6254 | Rel-16 | Standards specifications

Q: What power saving gain range is observed for the power saving scheme with PDCCH skipping or 'go-to-sleep' signal? [3GPP Release 16]

Expected: option 1 | paper: Option 1 | baseline: option 2

question 6258 | Rel-17 | Standards specifications

Q: How can an Evolved ProSe Remote UE get information about the PLMN to which a specific Evolved ProSe UE-to-Network Relay connects? [3GPP ...]

Expected: option 5 | paper: Option 5 | baseline: option 2

question 6379 | Rel-17 | Standards specifications

Q: Which element can use the identifier of the MSC/SGSN to determine the operator selected by a supporting UE or the operator allocated to ...

Expected: option 5 | paper: Option 5 | baseline: option 4

question 6582 | Rel-18 | Standards specifications

Q: What happens if the target RAN node cannot support the requirements in User Plane Security Enforcement information? [3GPP Release 18]

Expected: option 5 | paper: Option 5 | baseline: option 1

question 6612 | Rel-18 | Standards specifications

Q: Which entities are involved in the PDU Session establishment for supporting HR-SBO in VPLMN? [3GPP Release 18]

Expected: option 1 | paper: Option 1 | baseline: option 2

question 6760 | Rel-18 | Standards specifications

Q: What is dispersion analytics? [3GPP Release 18]

Expected: option 4 | paper: Option 4 | baseline: option 3

Questions Paper offline gets right and Paper baseline GSMA Rel-18 misses (65-72 of 91)

question 6775 | Rel-14 | Standards overview

Q: What is the common functional architecture called that supports mission critical services? [3GPP Release 14]

Expected: option 4 | paper: Option 4 | baseline: option 2

question 6828 | Rel-17 | Standards specifications

Q: What does a UE do with a BWP inactivity timer for a cell when the timer is running? [3GPP Release 17]

Expected: option 3 | paper: Option 3 | baseline: option 2

question 6888 | Rel-18 | Standards specifications

Q: Which models are constructed for LOS channel profiles? [3GPP Release 18]

Expected: option 3 | paper: Option 3 | baseline: option 1

question 6912 | Rel-17 | Standards specifications

Q: What are the possible classifications of OFDM symbols in a slot in a downlink frame? [3GPP Release 17]

Expected: option 2 | paper: Option 2 | baseline: option 1

question 6991 | Rel-18 | Standards specifications

Q: What does MPS prioritize in the PS domain when the network does not support the requested service? [3GPP Release 18]

Expected: option 4 | paper: Option 4 | baseline: option 2

question 7255 | Rel-17 | Standards specifications

Q: Which physical channel carries the uplink scheduling grant and the sidelink scheduling grant? [3GPP Release 17]

Expected: option 4 | paper: Option 4 | baseline: option 3

question 7476 | Rel-18 | Standards specifications

Q: What is the impact on UE power consumption with the reduction of TRPs? [3GPP Release 18]

Expected: option 3 | paper: Option 3 | baseline: option 5

question 7503 | Rel-17 | Standards overview

Q: Where are the relevant procedures for Disaster Roaming service updated? [3GPP Release 17]

Expected: option 1 | paper: Option 1 | baseline: option 2

Questions Paper offline gets right and Paper baseline GSMA Rel-18 misses (73-80 of 91)

question 7509 | Rel-18 | Standards specifications

Q: What is the purpose of the SMF Service Context Transfer procedures? [3GPP Release 18]

Expected: option 5 | paper: Option 5 | baseline: option 2

question 7614 | Rel-18 | Standards specifications

Q: What criteria are considered for periodic network selection attempts? [3GPP Release 18]

Expected: option 2 | paper: Option 2 | baseline: option 4

question 7622 | Rel-17 | Standards specifications

Q: In what scenarios may the network operator reduce network traffic further without reducing the Quality of Service (QoS)? [3GPP Release 17]

Expected: option 5 | paper: Option 5 | baseline: option 4

question 7658 | Rel-18 | Standards specifications

Q: What is the purpose of inter-level correlation? [3GPP Release 18]

Expected: option 2 | paper: Option 2 | baseline: option 4

question 7662 | Rel-17 | Standards specifications

Q: What is the purpose of the handover to NR procedure? [3GPP Release 17]

Expected: option 3 | paper: Option 3 | baseline: option 2

question 7962 | Rel-17 | Standards specifications

Q: How can the K-factor of LOS channel models be changed? [3GPP Release 17]

Expected: option 3 | paper: Option 3 | baseline: option 5

question 8200 | Rel-18 | Standards specifications

Q: What message does the AMF send to the NG-RAN during mobility registration, AM policy modification, and handover procedures? [3GPP ...]

Expected: option 4 | paper: Option 4 | baseline: option 1

question 8614 | Rel-18 | Standards specifications

Q: What is the value of REFSENS used in the SNR calculation? [3GPP Release 18]

Expected: option 1 | paper: Option 1 | baseline: option 2

Questions Paper offline gets right and Paper baseline GSMA Rel-18 misses (81-88 of 91)

question 8620 | Rel-17 | Standards specifications

Q: What determines the MCS of the PUSCH transmission? [3GPP Release 17]

Expected: option 5 | paper: Option 5 | baseline: option 3

question 9112 | Rel-17 | Standards specifications

Q: What can the LCS feature allow for a Target UE? [3GPP Release 17]

Expected: option 5 | paper: Option 5 | baseline: option 4

question 9124 | Rel-17 | Standards specifications

Q: What is the maximum frequency of messages per transmitting UE supported by the E-UTRA(N)? [3GPP Release 17]

Expected: option 3 | paper: Option 3 | baseline: option 2

question 9526 | Rel-17 | Standards specifications

Q: What are RAN assistance parameters used for in RRC_IDLE? [3GPP Release 17]

Expected: option 5 | paper: Option 5 | baseline: option 2

question 9631 | Rel-18 | Standards specifications

Q: What is the granularity of the global frequency raster for category NB1 and NB2? [3GPP Release 18]

Expected: option 2 | paper: Option 2 | baseline: option 1

question 9650 | Rel-18 | Standards specifications

Q: Which PDCP packet duplication is supported in LTE for improving reliability? [3GPP Release 18]

Expected: option 2 | paper: Option 2 | baseline: option 3

question 9743 | Rel-16 | Standards overview

Q: What requirements are specified as an update to Technical Specification 22.268 for an enhanced Public Warning System? [3GPP Release 16]

Expected: option 1 | paper: Option 1 | baseline: option 3

question 9745 | Rel-14 | Standards specifications

Q: What are the location requirements added for emergency calls in the Enhancing Location Capabilities for Indoor and Outdoor Emergency ...

Expected: option 3 | paper: Option 3 | baseline: option 2

Questions Paper offline gets right and Paper baseline GSMA Rel-18 misses (89-91 of 91)

question 9780 | Rel-18 | Standards specifications

Q: What is the behavior of a mobile station in state GMM-REGISTERED with substate NORMAL-SERVICE? [3GPP Release 18]

Expected: option 3 | paper: Option 3 | baseline: option 1

question 9880 | Rel-17 | Standards specifications

Q: What is the minimum user throughput required at the edge of coverage in the 5G system? [3GPP Release 17]

Expected: option 3 | paper: Option 3 | baseline: option 4

question 9949 | Rel-17 | Standards specifications

Q: What information does a supporting UE operating in Idle mode provide to the network? [3GPP Release 17]

Expected: option 2 | paper: Option 2 | baseline: option 1

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (1-8 of 329)

question 49 | Rel-18 | Standards specifications

Q: When does the AMF enable or disable the 5G access stratum time distribution for a UE? [3GPP Release 18]

Expected: option 5 | paper: Option 3 | baseline: option 5

question 74 | Rel-17 | Standards specifications

Q: What action is necessary to get access to services in Idle mode? [3GPP Release 17]

Expected: option 1 | paper: Option 5 | baseline: option 1

question 101 | Rel-16 | Standards overview

Q: What does the Multi-Identity (MiD) service enable? [3GPP Release 16]

Expected: option 2 | paper: Option 1 | baseline: option 2

question 108 | Rel-17 | Standards specifications

Q: What is the maximum number of PDU Sessions? [3GPP Release 17]

Expected: option 4 | paper: Option 1 | baseline: option 4

question 123 | Rel-18 | Standards specifications

Q: When can the V-SMF delete the DNS context from the selected V-EASDF? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 1

question 141 | Rel-17 | Standards specifications

Q: What is the purpose of the MasterInformationBlockSidelink message? [3GPP Release 17]

Expected: option 5 | paper: Option 4 | baseline: option 5

question 143 | Rel-18 | Standards specifications

Q: What is the indication used to invoke the terminal application in the peer end of a multimedia call? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 4

question 159 | Rel-18 | Standards specifications

Q: What happens during session termination in online charging? [3GPP Release 18]

Expected: option 5 | paper: Option 4 | baseline: option 5

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (9-16 of 329)

question 173 | Rel-18 | Standards specifications

Q: Can any party in a multiparty call undergo voice call continuity? [3GPP Release 18]

Expected: option 1 | paper: Option 4 | baseline: option 1

question 194 | Rel-18 | Standards specifications

Q: What does the home environment need to provide to the visited network when allowing a subscriber to roam to different domains? [3GPP ...

Expected: option 3 | paper: Option 2 | baseline: option 3

question 198 | Rel-17 | Standards specifications

Q: Which interface is used to transfer short messages between the SGSN and SMS-GMSC/SMS-IW MSC? [3GPP Release 17]

Expected: option 5 | paper: Option 3 | baseline: option 5

question 225 | Rel-17 | Standards specifications

Q: When is Paging with Wake Up Signal (WUS) used? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 2

question 244 | Rel-17 | Standards specifications

Q: How is Extended Access Barring supported in shared networks? [3GPP Release 17]

Expected: option 4 | paper: Option 2 | baseline: option 4

question 313 | Rel-17 | Standards specifications

Q: What is the high quality criterion for reporting a PLMN to the NAS in the E-UTRA and NB-IoT case? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 1

question 325 | Rel-17 | Standards specifications

Q: What is the RRC buffer size for a UE? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 2

question 454 | Rel-17 | Standards specifications

Q: What does the 5G system prevent in terms of privacy for UEs using 5G LAN-type service? [3GPP Release 17]

Expected: option 1 | paper: Option 5 | baseline: option 1

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (17-24 of 329)

question 475 | Rel-18 | Standards specifications
Q: Which solutions in LTE support configurable reliability and latency combinations? [3GPP Release 18]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 483 | Rel-17 | Standards specifications
Q: What is the typical connection density in factory automation applications? [3GPP Release 17]
Expected: option 3 | paper: Option 4 | baseline: option 3

question 539 | Rel-17 | Standards specifications
Q: What is the purpose of providing secure means for communication scheduling information to an NPN in a 5G network? [3GPP Release 17]
Expected: option 1 | paper: Option 4 | baseline: option 1

question 552 | Rel-18 | Standards specifications
Q: What does 5GS act as when integrated with IEEE TSN network? [3GPP Release 18]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 589 | Rel-18 | Standards specifications
Q: What types of services can be included in a subscription? [3GPP Release 18]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 609 | Rel-18 | Standards specifications
Q: What is the term for the interference between UL transmission in one cell and DL reception in another cell? [3GPP Release 18]
Expected: option 3 | paper: Option 4 | baseline: option 3

question 628 | Rel-18 | Standards specifications
Q: What are the components of the Charging Trigger Function (CTF)? [3GPP Release 18]
Expected: option 1 | paper: Option 5 | baseline: option 1

question 643 | Rel-18 | Standards specifications
Q: How can the network request the mobile station to change the UMTS codec during a speech call? [3GPP Release 18]
Expected: option 4 | paper: Option 1 | baseline: option 4

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (25-32 of 329)

question 648 | Rel-16 | Standards overview

Q: What does the Rel. 16 feature of Subscription information allow? [3GPP Release 16]

Expected: option 4 | paper: Option 1 | baseline: option 4

question 649 | Rel-18 | Standards specifications

Q: What is the purpose of control plane load control, congestion and overload control in the 5G System? [3GPP Release 18]

Expected: option 1 | paper: Option 3 | baseline: option 1

question 652 | Rel-18 | Standards specifications

Q: When is the authorization for connectivity and services evaluated? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 4

question 681 | Rel-18 | Standards specifications

Q: In which operation does the UDM update session management subscriber data stored in the SMF? [3GPP Release 18]

Expected: option 1 | paper: Option 4 | baseline: option 1

question 688 | Rel-14 | Standards overview

Q: What does QCI-1 represent in LTE? [3GPP Release 14]

Expected: option 2 | paper: Option 1 | baseline: option 2

question 710 | Rel-17 | Standards specifications

Q: Which specification specifies the Support of NR MBS in non-split gNB case? [3GPP Release 17]

Expected: option 3 | paper: Option 4 | baseline: option 3

question 715 | Rel-17 | Standards specifications

Q: What type of reports are used to support QoS-aware packet scheduling in the uplink? [3GPP Release 17]

Expected: option 4 | paper: Option 2 | baseline: option 4

question 731 | Rel-18 | Standards specifications

Q: Which reference point is between SMF and the CHF in the same PLMN? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 2

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (33-40 of 329)

question 812 | Rel-18 | Standards specifications

Q: How many demodulation branches are the radiated performance requirements limited to for SAN type 1-O? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 1

question 824 | Rel-18 | Standards specifications

Q: In which mode does an MS store the forbidden tracking area identity (TAI) in a list for regional provision of service? [3GPP Release 18]

Expected: option 3 | paper: Option 4 | baseline: option 3

question 836 | Rel-17 | Standards specifications

Q: In which specification are the training guidelines for MDA ML entities given? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 1

question 913 | Rel-18 | Standards specifications

Q: What is the purpose of Dual Connectivity in the RAN? [3GPP Release 18]

Expected: option 4 | paper: Option 3 | baseline: option 4

question 921 | Rel-17 | Standards specifications

Q: What is the scrambling sequence generator initialized with for a UE-specific search space? [3GPP Release 17]

Expected: option 4 | paper: Option 1 | baseline: option 4

question 923 | Rel-18 | Standards specifications

Q: What is the spacing between carriers for category M1? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 4

question 929 | Rel-18 | Standards specifications

Q: Which architecture supports offline and online charging for Non-seamless WLAN offloaded traffic from a 3GPP UE and for fixed devices? ...

Expected: option 2 | paper: Option 1 | baseline: option 2

question 946 | Rel-14 | Standards specifications

Q: Which stage introduced eCall for EPS over E-UTRAN? [3GPP Release 14]

Expected: option 2 | paper: Option 1 | baseline: option 2

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (41-48 of 329)

question 1044 | Rel-17 | Standards specifications

Q: What is the default value for the sl-MaxCID-r16 parameter in SidelinkPreconfigNR-r16? [3GPP Release 17]

Expected: option 2 | paper: Option 4 | baseline: option 2

question 1065 | Rel-18 | Standards specifications

Q: In SNPN access operation mode over 3GPP access, what lists does the MS maintain for regional provision of service? [3GPP Release 18]

Expected: option 2 | paper: Option 3 | baseline: option 2

question 1099 | Rel-18 | Standards specifications

Q: How is the 5G VN group configuration information delivered to the UE? [3GPP Release 18]

Expected: option 3 | paper: Option 5 | baseline: option 3

question 1119 | Rel-18 | Standards specifications

Q: What are the characteristics of the interfering signals for E-UTRA SAN? [3GPP Release 18]

Expected: option 2 | paper: Option 3 | baseline: option 2

question 1160 | Rel-17 | Standards specifications

Q: Is supporting periodic location reporting a requirement for Emergency Services? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 2

question 1174 | Rel-14 | Standards overview

Q: What action does the network take if a QCI-1 bearer setup request for VoLTE is rejected during a terminating session? [3GPP Release 14]

Expected: option 2 | paper: Option 1 | baseline: option 2

question 1210 | Rel-18 | Standards specifications

Q: What inputs are required for the Nmfa3caDataManagement_Notify service operation? [3GPP Release 18]

Expected: option 2 | paper: Option 3 | baseline: option 2

question 1211 | Rel-14 | Standards overview

Q: Which 3GPP working group is responsible for defining the security aspects of LTE based V2X communication? [3GPP Release 14]

Expected: option 3 | paper: Option 4 | baseline: option 3

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (49-56 of 329)

question 1246 | Rel-18 | Standards specifications
Q: What is the purpose of transferring CDRs via Bx? [3GPP Release 18]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 1248 | Rel-17 | Standards specifications
Q: What is the purpose of spreading in PUCCH formats 3 and 4? [3GPP Release 17]
Expected: option 2 | paper: Option 4 | baseline: option 2

question 1283 | Rel-18 | Standards specifications
Q: How is a 5G VN group identified? [3GPP Release 18]
Expected: option 2 | paper: Option 4 | baseline: option 2

question 1288 | Rel-17 | Standards specifications
Q: What are the two main groups of logical channels in the MAC sublayer? [3GPP Release 17]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 1299 | Rel-15 | Standards overview
Q: What is the purpose of the feature 'Multi-server bearer coordination' for MBMS usage in MC services? [3GPP Release 15]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 1310 | Rel-17 | Standards specifications
Q: What is VarMeasIdleConfig used for? [3GPP Release 17]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 1345 | Rel-17 | Standards specifications
Q: Which interface is used to transfer OAM traffic between the RN and the OAM system? [3GPP Release 17]
Expected: option 3 | paper: Option 5 | baseline: option 3

question 1355 | Rel-14 | Standards overview
Q: What aspect does the CT Work Item "V8-CT" focus on? [3GPP Release 14]
Expected: option 4 | paper: Option 3 | baseline: option 4

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (57-64 of 329)

question 1399 | Rel-17 | Standards overview

Q: What is a capability added in the V2X Application Enabler (VAE) layer? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 2

question 1459 | Rel-18 | Standards specifications

Q: What determines the mapping between service data of different domains? [3GPP Release 18]

Expected: option 2 | paper: Option 4 | baseline: option 2

question 1463 | Rel-18 | Standards specifications

Q: Which specification defines the Nchf_SpendingLimitControl service? [3GPP Release 18]

Expected: option 3 | paper: Option 4 | baseline: option 3

question 1512 | Rel-17 | Standards specifications

Q: What is the MDA capability for paging optimization analysis used for? [3GPP Release 17]

Expected: option 5 | paper: Option 1 | baseline: option 5

question 1524 | Rel-18 | Standards specifications

Q: Which two new QoS Class Identifiers (QCI) are added in 5G for Ultra Low Latency GBR services? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 2

question 1580 | Rel-18 | Standards specifications

Q: Which USIM registration triggers the allocation of a new 5G-GUTI for the Paging Timing Collision Control feature? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 2

question 1595 | Rel-17 | Standards specifications

Q: What is the purpose of dynamic resource schedulers in MAC in gNB? [3GPP Release 17]

Expected: option 1 | paper: Option 4 | baseline: option 1

question 1614 | Rel-17 | Standards specifications

Q: What does VarMeasReportList include? [3GPP Release 17]

Expected: option 4 | paper: Option 1 | baseline: option 4

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (65-72 of 329)

question 1640 | Rel-18 | Standards specifications

Q: What happens if the SDT procedure is unsuccessful? [3GPP Release 18]

Expected: option 5 | paper: Option 3 | baseline: option 5

question 1687 | Rel-17 | Standards overview

Q: What are the three features specified in TS 23.304 for 5G ProSe Direct Communication over NR based PC5 reference point? [3GPP Release 17]

Expected: option 2 | paper: Option 5 | baseline: option 2

question 1747 | Rel-17 | Standards specifications

Q: What does the MSC/SGSN inform gsmSCF about? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 3

question 1805 | Rel-18 | Standards specifications

Q: What specific identifiers are used for charging data correlation in the packet-switched domain? [3GPP Release 18]

Expected: option 2 | paper: Option 3 | baseline: option 2

question 1810 | Rel-18 | Standards specifications

Q: What is the minimum number of unique grid points based on the simulation results for the non-uniform measurement grids? [3GPP Release 18]

Expected: option 3 | paper: Option 5 | baseline: option 3

question 1821 | Rel-18 | Standards specifications

Q: What is the maximum value for the DTX to ACK probability for PUCCH transmission? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 1

question 1875 | Rel-18 | Standards specifications

Q: What is the responsibility of the network in the call control protocol? [3GPP Release 18]

Expected: option 2 | paper: Option 4 | baseline: option 2

question 1877 | Rel-18 | Standards specifications

Q: What is the SNR difference corresponding to a Δ thermal value of 6 dB? [3GPP Release 18]

Expected: option 4 | paper: Option 3 | baseline: option 4

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (73-80 of 329)

question 1891 | Rel-18 | Standards specifications

Q: What must a multi-mode terminal do when it enters 3GPP mode of operation? [3GPP Release 18]

Expected: option 1 | paper: Option 4 | baseline: option 1

question 1922 | Rel-17 | Standards overview

Q: How can UE power consumption due to false paging alarms be reduced? [3GPP Release 17]

Expected: option 5 | paper: Option 3 | baseline: option 5

question 2007 | Rel-18 | Standards specifications

Q: The Ga reference point allows the sending of _____ from the CDF to the CGF. [3GPP Release 18]

Expected: option 2 | paper: Option 3 | baseline: option 2

question 2009 | Rel-17 | Standards specifications

Q: What is the assumption about the scheduling or configuration of the UE for reception of other downlink signals in the DL PRS resource ...

Expected: option 2 | paper: Option 1 | baseline: option 2

question 2015 | Rel-17 | Standards specifications

Q: Which type of precoding is supported for PSSCH transmission? [3GPP Release 17]

Expected: option 2 | paper: Option 4 | baseline: option 2

question 2043 | Rel-17 | Standards specifications

Q: What type of modulation is used for PDCCH? [3GPP Release 17]

Expected: option 1 | paper: Option 2 | baseline: option 1

question 2057 | Rel-17 | Standards overview

Q: What functionality does Signalling Based Activation provide? [3GPP Release 17]

Expected: option 4 | paper: Option 3 | baseline: option 4

question 2080 | Rel-16 | Standards overview

Q: What is one of the functionalities introduced by the Media Handling Extensions for 5G Conversational Services work item? [3GPP Release 16]

Expected: option 1 | paper: Option 3 | baseline: option 1

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (81-88 of 329)

question 2101 | Rel-17 | Standards specifications

Q: Which document describes the transport channel and control channel data processing? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 2

question 2105 | Rel-17 | Standards specifications

Q: What is the formula to determine the Paging Frame (PF)? [3GPP Release 17]

Expected: option 5 | paper: Option 3 | baseline: option 5

question 2126 | Rel-18 | Standards specifications

Q: Which basic requirements shall be supported for CS multimedia calls? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 4

question 2136 | Rel-18 | Standards specifications

Q: What is the maximum achievable SNR for the demodulation test setup in band n262? [3GPP Release 18]

Expected: option 3 | paper: Option 4 | baseline: option 3

question 2188 | Rel-18 | Standards specifications

Q: Which reference point supports interaction between a CTF and a CDF? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 4

question 2193 | Rel-18 | Standards specifications

Q: How does the UE report its 3GPP PS Data Off status? [3GPP Release 18]

Expected: option 1 | paper: Option 4 | baseline: option 1

question 2197 | Rel-17 | Standards specifications

Q: How is the RB set for the PUSCH transmission determined when using RB set allocation? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 3

question 2210 | Rel-17 | Standards overview

Q: What is the purpose of the Provision of potential TRS/CSI-RS occasion(s) to idle/inactive-mode UEs? [3GPP Release 17]

Expected: option 4 | paper: Option 2 | baseline: option 4

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (89-96 of 329)

question 2337 | Rel-14 | Standards specifications

Q: What is the purpose of the work item related to group based enhancements in the network capability exposure functions? [3GPP Release 14]

Expected: option 1 | paper: Option 3 | baseline: option 1

question 2358 | Rel-16 | Standards overview

Q: What type of measurements does the Performance Measurement Function (PMF) support for ATSSS-LL functionality? [3GPP Release 16]

Expected: option 5 | paper: Option 2 | baseline: option 5

question 2370 | Rel-14 | Standards specifications

Q: What does the Work Item for eMBMS enhancements address? [3GPP Release 14]

Expected: option 2 | paper: Option 1 | baseline: option 2

question 2380 | Rel-18 | Standards specifications

Q: What is the purpose of N4 session management procedures? [3GPP Release 18]

Expected: option 2 | paper: Option 3 | baseline: option 2

question 2404 | Rel-17 | Standards specifications

Q: What is the maximum tolerable packet loss rate for reliability of V2X application messages? [3GPP Release 17]

Expected: option 4 | paper: Option 1 | baseline: option 4

question 2430 | Rel-18 | Standards specifications

Q: What is the definition of in-channel selectivity (ICS)? [3GPP Release 18]

Expected: option 3 | paper: Option 1 | baseline: option 3

question 2432 | Rel-18 | Standards specifications

Q: What is the relative increase in free space path loss from 43.5 GHz to 48.2 GHz? [3GPP Release 18]

Expected: option 2 | paper: Option 4 | baseline: option 2

question 2488 | Rel-17 | Standards specifications

Q: What is the purpose of contention window adjustment procedures for UL transmissions? [3GPP Release 17]

Expected: option 5 | paper: Option 4 | baseline: option 5

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (97-104 of 329)

question 2507 | Rel-17 | Standards specifications
Q: What does the UE do if it receives an RRC message on DCCH or CCCH that does not include a mandatory field? [3GPP Release 17]
Expected: option 1 | paper: Option 3 | baseline: option 1

question 2508 | Rel-17 | Standards specifications
Q: How does a UE determine the number of PSFCH resources available for multiplexing control information? [3GPP Release 17]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 2561 | Rel-17 | Standards overview
Q: In Rel-17, enhancements are made to several SEAL services. Which of the following is NOT an enhancement to SEAL services in Rel-17? ...
Expected: option 4 | paper: Option 3 | baseline: option 4

question 2728 | Rel-18 | Standards specifications
Q: When can a UE transmit new data in LTE if there is new data arrival? [3GPP Release 18]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 2767 | Rel-17 | Standards specifications
Q: How is the assistance information made available to the UE in UE-Assisted location services? [3GPP Release 17]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 2771 | Rel-18 | Standards specifications
Q: What mechanisms provide priority to QoS Flows established for sessions during periods of extreme overload? [3GPP Release 18]
Expected: option 2 | paper: Option 5 | baseline: option 2

question 2859 | Rel-18 | Standards specifications
Q: What is the purpose of the N5CW device in the control plane for trusted WLAN access? [3GPP Release 18]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 2936 | Rel-18 | Standards specifications
Q: What is the purpose of User Plane Security Enforcement information? [3GPP Release 18]
Expected: option 5 | paper: Option 2 | baseline: option 5

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (105-112 of 329)

question 2998 | Rel-17 | Standards overview
Q: What is the purpose of the Access Traffic Steering, Switching and Splitting (ATSS) feature in 5G networks? [3GPP Release 17]
Expected: option 1 | paper: Option 4 | baseline: option 1

question 3030 | Rel-18 | Standards specifications
Q: What is the value of SCSREFSENS used in the Noc methodology? [3GPP Release 18]
Expected: option 1 | paper: Option 3 | baseline: option 1

question 3051 | Rel-17 | Standards specifications
Q: What is a requirement for ProSe Discovery to determine whether other ProSe-enabled UEs are of interest to a discovering ProSe-enabled ...
Expected: option 3 | paper: Option 1 | baseline: option 3

question 3062 | Rel-18 | Standards specifications
Q: Which identity is used for filtering of packets at the physical layer of the receiver in NR sidelink communication? [3GPP Release 18]
Expected: option 3 | paper: Option 4 | baseline: option 3

question 3066 | Rel-18 | Standards specifications
Q: What do the reference architectures for supporting Edge Computing in 5GS build upon? [3GPP Release 18]
Expected: option 4 | paper: Option 2 | baseline: option 4

question 3068 | Rel-18 | Standards specifications
Q: What does the management service producer responsible for DV measurement control allow its authorized consumer to do? [3GPP Release 18]
Expected: option 3 | paper: Option 2 | baseline: option 3

question 3085 | Rel-17 | Standards specifications
Q: What does a control-resource set consist of? [3GPP Release 17]
Expected: option 2 | paper: Option 4 | baseline: option 2

question 3126 | Rel-17 | Standards specifications
Q: What does the ChannelAccess-CPext field indicate in Type-2 random access procedure for operation with shared spectrum channel access in ...
Expected: option 4 | paper: Option 2 | baseline: option 4

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (113-120 of 329)

question 3281 | Rel-14 | Standards overview
Q: What is the purpose of CC5 in the 3GPP release 14? [3GPP Release 14]
Expected: option 5 | paper: Option 1 | baseline: option 5

question 3284 | Rel-14 | Standards specifications
Q: Which feature enhances the granularity of RSTD reporting? [3GPP Release 14]
Expected: option 5 | paper: Option 3 | baseline: option 5

question 3312 | Rel-18 | Standards specifications
Q: How can the lists of 3GPP PS Data Off Exempt Services be provided to the UEs? [3GPP Release 18]
Expected: option 2 | paper: Option 4 | baseline: option 2

question 3358 | Rel-16 | Standards overview
Q: What does TSC stand for in the context of integration with IEEE TSN? [3GPP Release 16]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 3392 | Rel-18 | Standards specifications
Q: What are the optional inputs for the Ndrf_DataManagement_StorageRequest service operation? [3GPP Release 18]
Expected: option 5 | paper: Option 2 | baseline: option 5

question 3397 | Rel-18 | Standards specifications
Q: What happens if non-SDT data appears in a buffer during the SDT procedure? [3GPP Release 18]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 3405 | Rel-18 | Standards specifications
Q: What is the interfering signal for the in-channel selectivity requirement? [3GPP Release 18]
Expected: option 3 | paper: Option 4 | baseline: option 3

question 3428 | Rel-14 | Standards specifications
Q: What does the LTE Measurement Gap Enhancement work item specify? [3GPP Release 14]
Expected: option 1 | paper: Option 3 | baseline: option 1

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (121-128 of 329)

question 3466 | Rel-18 | Standards specifications
Q: What is the granularity of the 5GS TSN bridge? [3GPP Release 18]
Expected: option 1 | paper: Option 3 | baseline: option 1

question 3543 | Rel-18 | Standards specifications
Q: What is the purpose of segmentation of RRC messages? [3GPP Release 18]
Expected: option 4 | paper: Option 2 | baseline: option 4

question 3553 | Rel-18 | Standards specifications
Q: What is the SNR used for simulation of REFSENS? [3GPP Release 18]
Expected: option 4 | paper: Option 3 | baseline: option 4

question 3560 | Rel-17 | Standards specifications
Q: How many radio frame structures are supported for downlink and uplink transmissions? [3GPP Release 17]
Expected: option 3 | paper: Option 2 | baseline: option 3

question 3607 | Rel-14 | Standards overview
Q: What architecture is primarily used for MC service UE to obtain access to a MC service? [3GPP Release 14]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 3608 | Rel-14 | Standards overview
Q: Which enhancement is applicable to 'on-network' operation in MCPTT service? [3GPP Release 14]
Expected: option 1 | paper: Option 3 | baseline: option 1

question 3783 | Rel-17 | Standards specifications
Q: What is the minimum cell throughput capacity required on DL in the 5G system? [3GPP Release 17]
Expected: option 1 | paper: Option 3 | baseline: option 1

question 3819 | Rel-17 | Standards specifications
Q: What does the physical layer interface in the LTE radio interface protocol architecture? [3GPP Release 17]
Expected: option 1 | paper: Option 4 | baseline: option 1

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (129-136 of 329)

question 3836 | Rel-18 | Standards specifications
Q: What does the I-SMF Context Transfer procedure involve? [3GPP Release 18]
Expected: option 5 | paper: Option 1 | baseline: option 5

question 3837 | Rel-18 | Standards specifications
Q: What is the purpose of providing an ID in NAS signalling that represents a UE's radio capabilities? [3GPP Release 18]
Expected: option 2 | paper: Option 4 | baseline: option 2

question 3845 | Rel-18 | Standards specifications
Q: What is the purpose of the EEC Context ID? [3GPP Release 18]
Expected: option 5 | paper: Option 1 | baseline: option 5

question 3854 | Rel-18 | Standards specifications
Q: How does the UE report a change in its 3GPP PS Data Off status? [3GPP Release 18]
Expected: option 3 | paper: Option 1 | baseline: option 3

question 3857 | Rel-18 | Standards specifications
Q: Which sublayer is responsible for routing and next-hop determination on the backhaul link? [3GPP Release 18]
Expected: option 4 | paper: Option 3 | baseline: option 4

question 3946 | Rel-16 | Standards overview
Q: What happens in the EAP-based Network Slice-Specific authentication procedure? [3GPP Release 16]
Expected: option 3 | paper: Option 2 | baseline: option 3

question 3965 | Rel-18 | Standards specifications
Q: Does the 3GPP PS Data Off status affect data transfer over non-3GPP access? [3GPP Release 18]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 4001 | Rel-18 | Standards specifications
Q: How are charges settled between the different parties involved in the registration link? [3GPP Release 18]
Expected: option 2 | paper: Option 5 | baseline: option 2

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (137-144 of 329)

question 4011 | Rel-17 | Standards specifications
Q: Which of the following is NOT a type of V2X application? [3GPP Release 17]
Expected: option 4 | paper: Option 3 | baseline: option 4

question 4043 | Rel-15 | Standards overview
Q: Which specification defines the overall 5GS Stage 2? [3GPP Release 15]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 4046 | Rel-17 | Standards specifications
Q: What type of signal is used for wake-up in NB-IoT? [3GPP Release 17]
Expected: option 4 | paper: Option 3 | baseline: option 4

question 4082 | Rel-14 | Standards overview
Q: How can the V2X Application Server address be determined for V2X communication over LTE-Uu? [3GPP Release 14]
Expected: option 1 | paper: Option 3 | baseline: option 1

question 4083 | Rel-18 | Standards specifications
Q: How does the UE negotiate with the AF for analytics subscription? [3GPP Release 18]
Expected: option 4 | paper: Option 2 | baseline: option 4

question 4090 | Rel-14 | Standards overview
Q: Which document specifies the protocols for V2X authorization between the V2X Control Function and the HSS over the V4 interface? [3GPP ...]
Expected: option 5 | paper: Option 1 | baseline: option 5

question 4113 | Rel-17 | Standards specifications
Q: What is used to carry HARQ feedback over the sidelink? [3GPP Release 17]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 4184 | Rel-17 | Standards specifications
Q: What can the MDA MnS consumer expect from the MDA producer regarding the network context? [3GPP Release 17]
Expected: option 3 | paper: Option 4 | baseline: option 3

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (145-152 of 329)

question 4240 | Rel-18 | Standards specifications
Q: What mechanism allows an NG-RAN node to request activation of certain deactivated SSB beams? [3GPP Release 18]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 4254 | Rel-18 | Standards specifications
Q: Which entity controls the 5G Access Stratum-based Time Distribution for a UE? [3GPP Release 18]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 4321 | Rel-18 | Standards specifications
Q: What are the three connectivity models supported by 5GC to enable Edge Computing? [3GPP Release 18]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 4348 | Rel-18 | Standards specifications
Q: What is the maximum number of configured CCs for a UE in Carrier Aggregation (CA)? [3GPP Release 18]
Expected: option 3 | paper: Option 16 | baseline: option 3

question 4378 | Rel-17 | Standards specifications
Q: Which message is used for the sidelink transfer of Paging message and System Information messages? [3GPP Release 17]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 4446 | Rel-14 | Standards overview
Q: Which media transport protocols are supported for MCVideo service? [3GPP Release 14]
Expected: option 1 | paper: Option 3 | baseline: option 1

question 4480 | Rel-18 | Standards specifications
Q: How does the NWDAF collect data for Collective Behaviour attributes? [3GPP Release 18]
Expected: option 3 | paper: Option 5 | baseline: option 3

question 4513 | Rel-17 | Standards specifications
Q: What is the maximum delay for control plane latency in the Evolved Packet System? [3GPP Release 17]
Expected: option 2 | paper: Option 1 | baseline: option 2

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (153-160 of 329)

question 4520 | Rel-17 | Standards specifications
Q: How many consecutive sub-carriers during one slot correspond to one downlink resource block? [3GPP Release 17]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 4525 | Rel-17 | Standards specifications
Q: How should the UE handle an error regarding the conditionality of a field in an extension addition group? [3GPP Release 17]
Expected: option 3 | paper: Option 2 | baseline: option 3

question 4538 | Rel-17 | Standards specifications
Q: Which scenario requires very high connection density and the ability to share what the users see and hear? [3GPP Release 17]
Expected: option 4 | paper: Option 5 | baseline: option 4

question 4561 | Rel-18 | Standards specifications
Q: Who is the consumer of the PFD Determination analytics? [3GPP Release 18]
Expected: option 4 | paper: Option 2 | baseline: option 4

question 4576 | Rel-18 | Standards specifications
Q: Which reference point supports interaction between the OCF and a Rating Function (RF)? [3GPP Release 18]
Expected: option 4 | paper: Option 3 | baseline: option 4

question 4579 | Rel-18 | Standards specifications
Q: What inputs are required for the Nmfaf_3daDataManagement_Deconfigure service operation? [3GPP Release 18]
Expected: option 1 | paper: Option 3 | baseline: option 1

question 4588 | Rel-18 | Standards specifications
Q: What is a roaming broker enabled Home Environment? [3GPP Release 18]
Expected: option 2 | paper: Option 4 | baseline: option 2

question 4651 | Rel-18 | Standards specifications
Q: What does FL server NWDAF do in the FL procedure? [3GPP Release 18]
Expected: option 4 | paper: Option 3 | baseline: option 4

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (161-168 of 329)

question 4652 | Rel-18 | Standards specifications
Q: How can a Service User initiate MPS for an MMTEL voice call with a UE that does not have an MPS subscription? [3GPP Release 18]
Expected: option 3 | paper: Option 4 | baseline: option 3

question 4704 | Rel-17 | Standards specifications
Q: Which of the following is a requirement for ranging-based services in the 5G system? [3GPP Release 17]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 4759 | Rel-18 | Standards specifications
Q: Which reference point replaces the Gz reference point within the common charging architecture? [3GPP Release 18]
Expected: option 5 | paper: Option 3 | baseline: option 5

question 4770 | Rel-18 | Standards specifications
Q: Which transmission mode does the RLC sublayer use for SRB0, paging, and broadcast system information? [3GPP Release 18]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 4821 | Rel-18 | Standards specifications
Q: What is the purpose of the Traffic management requirements in the application layer architecture? [3GPP Release 18]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 4850 | Rel-18 | Standards specifications
Q: What is the purpose of the Session-AMBR? [3GPP Release 18]
Expected: option 3 | paper: Option 4 | baseline: option 3

question 4903 | Rel-18 | Standards specifications
Q: Which uncertainty element is applicable to the CFFdeltaNF methodology? [3GPP Release 18]
Expected: option 5 | paper: Option 3 | baseline: option 5

question 5079 | Rel-18 | Standards specifications
Q: What is the purpose of the Permanent Equipment Identifier (PEI)? [3GPP Release 18]
Expected: option 5 | paper: Option 4 | baseline: option 5

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (169-176 of 329)

question 5165 | Rel-18 | Standards specifications
Q: What are the abilities provided by subscription-related priority mechanisms? [3GPP Release 18]
Expected: option 1 | paper: Option 5 | baseline: option 1

question 5183 | Rel-17 | Standards specifications
Q: What is expected in terms of unauthorized UEs accessing non-public networks? [3GPP Release 17]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 5198 | Rel-14 | Standards overview
Q: What security mechanism is used for securing the V3 interface between the UE and the V2X Control Function? [3GPP Release 14]
Expected: option 3 | paper: Option 1 | baseline: option 3

question 5210 | Rel-18 | Standards specifications
Q: What does CFI stand for in the context of LTE_HRLLC? [3GPP Release 18]
Expected: option 3 | paper: Option 1 | baseline: option 3

question 5219 | Rel-17 | Standards specifications
Q: What is the meaning of the tag 'Otherwise, the field is absent, Need R'? [3GPP Release 17]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 5387 | Rel-14 | Standards specifications
Q: Which work item specifies the use cases and requirements for management of measurements for cross-operator accounting? [3GPP Release 14]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 5451 | Rel-18 | Standards specifications
Q: What is the term for the interference between UL and DL transmissions in different cells due to atmospheric ducting? [3GPP Release 18]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 5459 | Rel-18 | Standards specifications
Q: How many user priority levels are supported by the 3GPP network? [3GPP Release 18]
Expected: option 3 | paper: Option 5 | baseline: option 3

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (177-184 of 329)

question 5463 | Rel-18 | Standards specifications
Q: What is the reference point for measurement of EVM? [3GPP Release 18]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 5485 | Rel-18 | Standards specifications
Q: What is the purpose of the N4 Session Establishment procedure? [3GPP Release 18]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 5490 | Rel-17 | Standards overview
Q: What information is broadcasted in the system information for slice aware cell reselection? [3GPP Release 17]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 5493 | Rel-14 | Standards overview
Q: How is the recommended bitrate conveyed from the eNB to the UE? [3GPP Release 14]
Expected: option 3 | paper: Option 1 | baseline: option 3

question 5518 | Rel-17 | Standards specifications
Q: How many consecutive sub-carriers form a Physical Resource Block (PRB)? [3GPP Release 17]
Expected: option 4 | paper: Option 12 | baseline: option 4

question 5547 | Rel-17 | Standards specifications
Q: What should be supported for end-to-end codec negotiation? [3GPP Release 17]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 5607 | Rel-18 | Standards specifications
Q: What is the measurement period for EVM in E-UTRA? [3GPP Release 18]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 5608 | Rel-17 | Standards specifications
Q: Besides the short service definition and description of normal operation, what other information is provided for each supplementary ...
Expected: option 4 | paper: Option 1 | baseline: option 4

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (185-192 of 329)

question 5613 | Rel-18 | Standards specifications
Q: Will the UE configuration of enabled/disabled radio technologies remain the same after a power-cycle or when the USIM is disabled? [3GPP ...
Expected: option 1 | paper: Option 2 | baseline: option 1

question 5624 | Rel-17 | Standards specifications
Q: What is the total layer 2 buffer size for NR SL? [3GPP Release 17]
Expected: option 1 | paper: Option 4 | baseline: option 1

question 5655 | Rel-17 | Standards specifications
Q: In the context of cell status and cell reservations, what does the field 'cellBarred' indicate? [3GPP Release 17]
Expected: option 3 | paper: Option 1 | baseline: option 3

question 5669 | Rel-17 | Standards specifications
Q: What is provisioning in the context of the Target UE? [3GPP Release 17]
Expected: option 5 | paper: Option 3 | baseline: option 5

question 5684 | Rel-18 | Standards specifications
Q: What is the impact of voice call continuity on the quality of the voice service? [3GPP Release 18]
Expected: option 3 | paper: Option 2 | baseline: option 3

question 5739 | Rel-18 | Standards specifications
Q: How many energy saving states can cells, network elements, and network functions be in? [3GPP Release 18]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 5750 | Rel-18 | Standards specifications
Q: What is the optional output for the Ndccf_ContextManagement_Deregister service operation? [3GPP Release 18]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 5787 | Rel-15 | Standards overview
Q: What is EN-DC in the context of 5G? [3GPP Release 15]
Expected: option 2 | paper: Option 4 | baseline: option 2

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (193-200 of 329)

question 5788 | Rel-18 | Standards specifications
Q: What does Dual Connectivity allow the Master RAN Node to do? [3GPP Release 18]
Expected: option 1 | paper: Option 5 | baseline: option 1

question 5835 | Rel-18 | Standards specifications
Q: How are EE KPIs for network elements expressed? [3GPP Release 18]
Expected: option 1 | paper: Option 4 | baseline: option 1

question 5841 | Rel-17 | Standards specifications
Q: What are the three levels of services defined for a UE in Idle mode? [3GPP Release 17]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 5853 | Rel-18 | Standards specifications
Q: What is the relative increase in cable loss per meter from 43.5 GHz to 48.2 GHz? [3GPP Release 18]
Expected: option 1 | paper: Option 3 | baseline: option 1

question 5892 | Rel-15 | Standards overview
Q: What is the expected reliability for remote control for process automation in 5G? [3GPP Release 15]
Expected: option 5 | paper: Option 4 | baseline: option 5

question 5904 | Rel-17 | Standards specifications
Q: What drives the need for secure mechanisms to establish or refresh credentials and subscriptions in IoT devices? [3GPP Release 17]
Expected: option 1 | paper: Option 4 | baseline: option 1

question 5913 | Rel-18 | Standards specifications
Q: What is the purpose of an Application Group ID? [3GPP Release 18]
Expected: option 3 | paper: Option 5 | baseline: option 3

question 5949 | Rel-16 | Standards overview
Q: Which additional positioning technique is supported in Rel-16 LPP for GNSS SSR? [3GPP Release 16]
Expected: option 1 | paper: Option 5 | baseline: option 1

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (201-208 of 329)

question 6005 | Rel-18 | Standards specifications
Q: What is the purpose of RAN visible QoE measurements? [3GPP Release 18]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 6037 | Rel-17 | Standards specifications
Q: What are the three factors that govern the PDCCH monitoring activity of the UE in RRC connected mode? [3GPP Release 17]
Expected: option 5 | paper: Option 1 | baseline: option 5

question 6059 | Rel-17 | Standards specifications
Q: What is the periodicity of half frames with SS/PBCH blocks for initial cell selection in an IAB-MT? [3GPP Release 17]
Expected: option 4 | paper: Option 2 | baseline: option 4

question 6105 | Rel-18 | Standards specifications
Q: What is the purpose of the Single link polarization measurement? [3GPP Release 18]
Expected: option 5 | paper: Option 1 | baseline: option 5

question 6135 | Rel-18 | Standards specifications
Q: Which of the following is not a feature that can be calibrated? [3GPP Release 18]
Expected: option 5 | paper: Option 1 | baseline: option 5

question 6147 | Rel-17 | Standards specifications
Q: What is the purpose of the 3GPP management system interacting with NWDAF? [3GPP Release 17]
Expected: option 1 | paper: Option 4 | baseline: option 1

question 6171 | Rel-14 | Standards overview
Q: What range of transport block sizes can a Category NB2 UE support? [3GPP Release 14]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 6195 | Rel-19 | Standards specifications
Q: Which of the following is NOT a requirement for the 5G system to support direct device connection? [3GPP Release 19]
Expected: option 4 | paper: Option 1 | baseline: option 4

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (209-216 of 329)

question 6198 | Rel-18 | Standards specifications
Q: What is the primary purpose of MPS for DTS? [3GPP Release 18]
Expected: option 3 | paper: Option 1 | baseline: option 3

question 6206 | Rel-17 | Standards specifications
Q: What is included in the UE CONTEXT SETUP REQUEST message in the Intra-CU topology adaptation procedure in SA? [3GPP Release 17]
Expected: option 5 | paper: Option 1 | baseline: option 5

question 6268 | Rel-17 | Standards specifications
Q: What are the procedures for a Target UE's privacy exception list? [3GPP Release 17]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 6277 | Rel-17 | Standards specifications
Q: In a shared UTRAN/GERAN network, what does a non-supporting UE do after reading the broadcast system information? [3GPP Release 17]
Expected: option 3 | paper: Option 2 | baseline: option 3

question 6296 | Rel-18 | Standards specifications
Q: Which specification defines IMS support for 5GC? [3GPP Release 18]
Expected: option 5 | paper: Option 3 | baseline: option 5

question 6354 | Rel-17 | Standards specifications
Q: Which entity is used as an SGSN for only some GTP signalling messages in a GLR-equipped VPLMN? [3GPP Release 17]
Expected: option 3 | paper: Option 2 | baseline: option 3

question 6359 | Rel-17 | Standards specifications
Q: What should the UE do when receiving an RRC message on the BCCH, CCCH, PCCH, MCCH or a PC5 RRC message on SBCCH for which the abstract ...
Expected: option 1 | paper: Option 3 | baseline: option 1

question 6375 | Rel-17 | Standards specifications
Q: What does the Evolved Packet System provide for interworking between fixed access and Evolved Packet Core? [3GPP Release 17]
Expected: option 1 | paper: Option 5 | baseline: option 1

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (217-224 of 329)

question 6393 | Rel-18 | Standards specifications
Q: Which mode of the NF/NF Service Context Transfer Procedures includes an endpoint address? [3GPP Release 18]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 6545 | Rel-18 | Standards specifications
Q: What is the Access Network called in the SA architecture? [3GPP Release 18]
Expected: option 2 | paper: Option 5 | baseline: option 2

question 6585 | Rel-17 | Standards specifications
Q: What is the maximum range of coverage the 5G system should support in low density areas? [3GPP Release 17]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 6596 | Rel-18 | Standards specifications
Q: Which reference point provides similar functionality for online charging as Ro? [3GPP Release 18]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 6597 | Rel-18 | Standards specifications
Q: Which network domain does MPS primarily operate in? [3GPP Release 18]
Expected: option 3 | paper: Option 1 | baseline: option 3

question 6602 | Rel-18 | Standards specifications
Q: What is the purpose of Random Access Channel (RACH)? [3GPP Release 18]
Expected: option 4 | paper: Option 5 | baseline: option 4

question 6604 | Rel-17 | Standards specifications
Q: What is the purpose of the IM-MSC in a GLR-equipped VPLMN? [3GPP Release 17]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 6609 | Rel-15 | Standards overview
Q: What is one of the key functionalities covered by the 5G data connectivity charging solution? [3GPP Release 15]
Expected: option 4 | paper: Option 3 | baseline: option 4

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (225-232 of 329)

question 6648 | Rel-18 | Standards specifications
Q: What is the purpose of an investigation PLMN scan for a multi-mode terminal? [3GPP Release 18]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 6661 | Rel-17 | Standards specifications
Q: What is the purpose of the SGNB MODIFICATION REQUIRED message in the inter-gNB-DU mobility procedure using MCG SRB in EN-DC? [3GPP ...]
Expected: option 5 | paper: Option 1 | baseline: option 5

question 6682 | Rel-18 | Standards specifications
Q: How is traffic routing influenced for a 5G VN group? [3GPP Release 18]
Expected: option 2 | paper: Option 4 | baseline: option 2

question 6741 | Rel-18 | Standards specifications
Q: When does the PCF include the Duplicated notification indication in the PCC rule? [3GPP Release 18]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 6750 | Rel-18 | Standards specifications
Q: What type of data does NWDAF collect from AF? [3GPP Release 18]
Expected: option 5 | paper: Option 2 | baseline: option 5

question 6877 | Rel-18 | Standards specifications
Q: Which function receives charging events from the CTF? [3GPP Release 18]
Expected: option 5 | paper: Option 3 | baseline: option 5

question 6889 | Rel-18 | Standards specifications
Q: What is the MPS code/identifier used for? [3GPP Release 18]
Expected: option 4 | paper: Option 3 | baseline: option 4

question 6956 | Rel-17 | Standards specifications
Q: In a 5G system with satellite access, what information should charging call records associated with satellite access include? [3GPP ...]
Expected: option 1 | paper: Option 4 | baseline: option 1

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (233-240 of 329)

question 7005 | Rel-18 | Standards specifications
Q: Which identifier is used to uniquely identify the UE within the AMF? [3GPP Release 18]
Expected: option 5 | paper: Option 1 | baseline: option 5

question 7028 | Rel-18 | Standards specifications
Q: What is the maximum rank supported with slot/subslot PDSCH repetition in LTE? [3GPP Release 18]
Expected: option 2 | paper: Option 4 | baseline: option 2

question 7070 | Rel-16 | Standards overview
Q: What is the purpose of Time Sensitive Communication Assistance Information (TSCAI) in the support of NR Industrial Internet of Things? ...
Expected: option 2 | paper: Option 3 | baseline: option 2

question 7093 | Rel-18 | Standards specifications
Q: What determines the redundancy handling of a PDU Session in URLLC? [3GPP Release 18]
Expected: option 1 | paper: Option 5 | baseline: option 1

question 7164 | Rel-18 | Standards specifications
Q: What is the purpose of IOI concept in inter-operator charging? [3GPP Release 18]
Expected: option 3 | paper: Option 2 | baseline: option 3

question 7199 | Rel-18 | Standards specifications
Q: Which type of IOI is used between the home IMS network operator and a service provider? [3GPP Release 18]
Expected: option 3 | paper: Option 1 | baseline: option 3

question 7274 | Rel-18 | Standards specifications
Q: What can an NG-RAN node do with the paging enhancements mechanism? [3GPP Release 18]
Expected: option 3 | paper: Option 2 | baseline: option 3

question 7278 | Rel-14 | Standards overview
Q: How is V2X authorization between the UE and the V2X Control Function conducted? [3GPP Release 14]
Expected: option 3 | paper: Option 2 | baseline: option 3

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (241-248 of 329)

question 7288 | Rel-17 | Standards specifications
Q: What happens if the UE ignores the scheduling DCI when the first uplink symbol to carry the corresponding CSI report(s) starts earlier ...
Expected: option 1 | paper: Option 4 | baseline: option 1

question 7307 | Rel-18 | Standards specifications
Q: What needs to be changed or added based on the analytics information of Application AI/ML traffic transmission status? [3GPP Release 18]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 7409 | Rel-16 | Standards overview
Q: What is the purpose of QoS Monitoring in the enhancement of URLLC support in the 5G Core network? [3GPP Release 16]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 7453 | Rel-17 | Standards specifications
Q: What is a mobile base station relay? [3GPP Release 17]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 7463 | Rel-17 | Standards specifications
Q: What is the maximum inter-site distance supported by the 5G system for a stand-alone multicast/broadcast network? [3GPP Release 17]
Expected: option 3 | paper: Option 2 | baseline: option 3

question 7477 | Rel-18 | Standards specifications
Q: What does the SMF determine when it receives notification on the requested analytics from the NWDAF? [3GPP Release 18]
Expected: option 5 | paper: Option 3 | baseline: option 5

question 7488 | Rel-16 | Standards overview
Q: What is the purpose of the Coverage and Handoff Enhancements for Multimedia (CHEM) feature? [3GPP Release 16]
Expected: option 1 | paper: Option 3 | baseline: option 1

question 7493 | Rel-18 | Standards specifications
Q: Which scenario is intended to capture real-life scenarios such as a city or station square? [3GPP Release 18]
Expected: option 1 | paper: Option 2 | baseline: option 1

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (249-256 of 329)

question 7497 | Rel-14 | Standards specifications
Q: What is the purpose of Control and User Plane Separation of EPC nodes in LTE? [3GPP Release 14]
Expected: option 3 | paper: Option 5 | baseline: option 3

question 7534 | Rel-18 | Standards specifications
Q: What is the finest granularity of QoS differentiation at NAS level? [3GPP Release 18]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 7595 | Rel-16 | Standards overview
Q: What are the supported measurement gaps for DL PRS and NR/LTE RRM measurements in Rel-16? [3GPP Release 16]
Expected: option 3 | paper: Option 2 | baseline: option 3

question 7629 | Rel-18 | Standards specifications
Q: What is the primary cell (PCell) in the context of RRC? [3GPP Release 18]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 7657 | Rel-18 | Standards specifications
Q: Which component handles the request for prioritized QoS Flows for Mobile Originations? [3GPP Release 18]
Expected: option 2 | paper: Option 4 | baseline: option 2

question 7709 | Rel-18 | Standards specifications
Q: When can the SDT procedure over CG resources be initiated? [3GPP Release 18]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 7788 | Rel-15 | Standards overview
Q: What is the objective of enhancing the interactions between 3GPP management system and supporting external management systems in the ...
Expected: option 1 | paper: Option 5 | baseline: option 1

question 7810 | Rel-18 | Standards specifications
Q: What is the value of Δ_{thermal} used in the Noc methodology? [3GPP Release 18]
Expected: option 1 | paper: Option 2 | baseline: option 1

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (257-264 of 329)

question 7881 | Rel-17 | Standards specifications
Q: How does the gNB allocate downlink resources for initial HARQ transmissions to UEs? [3GPP Release 17]
Expected: option 4 | paper: Option 3 | baseline: option 4

question 7905 | Rel-18 | Standards specifications
Q: Which mode does the CGF use to transfer CDR files to the BD? [3GPP Release 18]
Expected: option 3 | paper: Option 1 | baseline: option 3

question 7974 | Rel-18 | Standards specifications
Q: What does the NWDAF provide to the consumer when the congestion level crosses the threshold? [3GPP Release 18]
Expected: option 3 | paper: Option 2 | baseline: option 3

question 7980 | Rel-17 | Standards specifications
Q: What resource set does a RedCap UE use to transmit PUCCH if it is not provided initialUplinkBWP-RedCap in UplinkConfigCommonSIB and does ...
Expected: option 5 | paper: Option 2 | baseline: option 5

question 8003 | Rel-18 | Standards specifications
Q: How can power saving be achieved in RRC_IDLE and RRC_INACTIVE? [3GPP Release 18]
Expected: option 3 | paper: Option 4 | baseline: option 3

question 8030 | Rel-17 | Standards specifications
Q: What does a '0' value for a bit of the bitmap, provided by dormancyGroupWithinActiveTime, indicate? [3GPP Release 17]
Expected: option 3 | paper: Option 2 | baseline: option 3

question 8063 | Rel-18 | Standards specifications
Q: How are transactions dispersion analytics calculated? [3GPP Release 18]
Expected: option 1 | paper: Option 4 | baseline: option 1

question 8110 | Rel-17 | Standards specifications
Q: Which physical layer processing step includes LDPC coding? [3GPP Release 17]
Expected: option 3 | paper: Option 4 | baseline: option 3

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (265-272 of 329)

question 8117 | Rel-18 | Standards specifications
Q: What is the interfering signal for the dynamic range requirement? [3GPP Release 18]
Expected: option 3 | paper: Option 4 | baseline: option 3

question 8153 | Rel-18 | Standards specifications
Q: What does OTA REFSENS requirement ensure? [3GPP Release 18]
Expected: option 5 | paper: Option 2 | baseline: option 5

question 8216 | Rel-18 | Standards specifications
Q: What is the minimum throughput requirement for the dynamic range of SAN supporting standalone NB-IoT operation? [3GPP Release 18]
Expected: option 1 | paper: Option 4 | baseline: option 1

question 8230 | Rel-14 | Standards overview
Q: How many DL and UL non-anchor carriers can be configured in a new NB-IoT SIB? [3GPP Release 14]
Expected: option 3 | paper: Option 5 | baseline: option 3

question 8266 | Rel-18 | Standards specifications
Q: What charging principle should be possible to apply during an active session? [3GPP Release 18]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 8269 | Rel-15 | Standards overview
Q: What is the main purpose of the Charging Function (CHF) in the 5G Phase 1 architecture? [3GPP Release 15]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 8335 | Rel-17 | Standards specifications
Q: Where can full details of operation under the 'Access class barred list' be found? [3GPP Release 17]
Expected: option 3 | paper: Option 1 | baseline: option 3

question 8350 | Rel-18 | Standards specifications
Q: What does the Paging Cause Indication feature in a Multi-USIM UE and network support? [3GPP Release 18]
Expected: option 1 | paper: Option 5 | baseline: option 1

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (273-280 of 329)

question 8462 | Rel-14 | Standards overview
Q: What determines the selection of a Dedicated Core Network in GERAN? [3GPP Release 14]
Expected: option 4 | paper: Option 2 | baseline: option 4

question 8485 | Rel-18 | Standards specifications
Q: In which state should the UE be for the NG-RAN to send a Location Report including the UE's last known location with timestamp? [3GPP ...]
Expected: option 5 | paper: Option 2 | baseline: option 5

question 8531 | Rel-17 | Standards specifications
Q: Which modulation schemes are used for PUCCH and NPUSCH transmission? [3GPP Release 17]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 8541 | Rel-17 | Standards specifications
Q: What is the purpose of the Remote Interference Management (RIM) function? [3GPP Release 17]
Expected: option 3 | paper: Option 1 | baseline: option 3

question 8578 | Rel-17 | Standards specifications
Q: In Type 1 DL channel access procedures, when does the eNB/gNB transmit a transmission? [3GPP Release 17]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 8601 | Rel-18 | Standards specifications
Q: Which sublayer is responsible for transfer of upper layer PDUs? [3GPP Release 18]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 8617 | Rel-18 | Standards specifications
Q: How are subsequent UL transmissions handled in the SDT procedure? [3GPP Release 18]
Expected: option 5 | paper: Option 4 | baseline: option 5

question 8762 | Rel-17 | Standards specifications
Q: Which group focuses on defining and parameterizing indoor scenarios for mmWave propagation channels? [3GPP Release 17]
Expected: option 4 | paper: Option 2 | baseline: option 4

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (281-288 of 329)

question 8770 | Rel-18 | Standards specifications
Q: What does the AMF do after purging the subscriber data and MM context of a deregistered UE? [3GPP Release 18]
Expected: option 2 | paper: Option 4 | baseline: option 2

question 8798 | Rel-17 | Standards specifications
Q: What is the purpose of the Inter-gNB-DU Conditional PSCell Change using MCG SRB without MN negotiation procedure? [3GPP Release 17]
Expected: option 5 | paper: Option 1 | baseline: option 5

question 8801 | Rel-17 | Standards specifications
Q: What is used to indicate resource and transmission parameters for PSSCH? [3GPP Release 17]
Expected: option 5 | paper: Option 4 | baseline: option 5

question 8860 | Rel-15 | Standards overview
Q: What is the purpose of the Unlicensed Spectrum Offloading System? [3GPP Release 15]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 8874 | Rel-18 | Standards specifications
Q: What is the purpose of the RSRP(B)-based RX beam peak search approach? [3GPP Release 18]
Expected: option 3 | paper: Option 5 | baseline: option 3

question 8901 | Rel-18 | Standards specifications
Q: What does NWDAF provide with Network Performance Analytics? [3GPP Release 18]
Expected: option 1 | paper: Option 3 | baseline: option 1

question 8915 | Rel-14 | Standards overview
Q: What is the purpose of the eVoLTE CE technologies? [3GPP Release 14]
Expected: option 5 | paper: Option 2 | baseline: option 5

question 8948 | Rel-18 | Standards specifications
Q: What is the purpose of the Nmfaf_3caDataManagement service? [3GPP Release 18]
Expected: option 3 | paper: Option 1 | baseline: option 3

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (289-296 of 329)

question 8950 | Rel-14 | Standards overview
Q: Which high level deployment configuration supports distributed algorithms for scheduling and interference management of V2V traffic? ...
Expected: option 1 | paper: Option 4 | baseline: option 1

question 8987 | Rel-15 | Standards overview
Q: Which stage 1 specifications specify the architecture and information flows to support Mission Critical Push To Talk (MCPTT)? [3GPP ...
Expected: option 5 | paper: Option 4 | baseline: option 5

question 9013 | Rel-18 | Standards specifications
Q: Which control mechanism allows the network to control the behavior of UEs in E-UTRAN in connected mode? [3GPP Release 18]
Expected: option 5 | paper: Option 2 | baseline: option 5

question 9014 | Rel-16 | Standards overview
Q: For the Analytics ID 'Network Performance', which Consumer NF may use it? [3GPP Release 16]
Expected: option 4 | paper: Option 3 | baseline: option 4

question 9028 | Rel-18 | Standards specifications
Q: What is the required accuracy for the modulated carrier frequency of each carrier configured by the SAN? [3GPP Release 18]
Expected: option 3 | paper: Option 2 | baseline: option 3

question 9052 | Rel-18 | Standards specifications
Q: What is Small Data Transmission (SDT)? [3GPP Release 18]
Expected: option 5 | paper: Option 1 | baseline: option 5

question 9074 | Rel-17 | Standards overview
Q: What is the purpose of the Network Slicing Admission Control Function (NSACF)? [3GPP Release 17]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 9095 | Rel-18 | Standards specifications
Q: What is the purpose of the Ndccf_ContextManagement_Register service operation? [3GPP Release 18]
Expected: option 3 | paper: Option 1 | baseline: option 3

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (297-304 of 329)

question 9139 | Rel-14 | Standards overview

Q: Which 3GPP specification provides details for the protocols between BM-SC and MBMS-GW? [3GPP Release 14]

Expected: option 1 | paper: Option 2 | baseline: option 1

question 9146 | Rel-17 | Standards specifications

Q: Which identity is used for identification of Paging and System Information change notification in the downlink? [3GPP Release 17]

Expected: option 5 | paper: Option 3 | baseline: option 5

question 9168 | Rel-18 | Standards specifications

Q: When is DCP monitored by the UE? [3GPP Release 18]

Expected: option 4 | paper: Option 1 | baseline: option 4

question 9191 | Rel-18 | Standards specifications

Q: What is the potential transport layer for SLPP? [3GPP Release 18]

Expected: option 5 | paper: Option 1 | baseline: option 5

question 9208 | Rel-18 | Standards specifications

Q: What are the required inputs for the Ndrf_MLModelManagement_Delete service operation? [3GPP Release 18]

Expected: option 4 | paper: Option 5 | baseline: option 4

question 9224 | Rel-18 | Standards specifications

Q: Which waveform is used for downlink transmission? [3GPP Release 18]

Expected: option 3 | paper: Option 2 | baseline: option 3

question 9231 | Rel-17 | Standards specifications

Q: What is the purpose of CS fallback in the Evolved Packet System? [3GPP Release 17]

Expected: option 5 | paper: Option 4 | baseline: option 5

question 9244 | Rel-18 | Standards specifications

Q: What is the role of the Charging Gateway Function (CGF)? [3GPP Release 18]

Expected: option 3 | paper: Option 2 | baseline: option 3

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (305-312 of 329)

question 9324 | Rel-16 | Standards overview
Q: Which 3GPP Technical Specification covers the service requirements for maritime communication over 5G systems? [3GPP Release 16]
Expected: option 3 | paper: Option 4 | baseline: option 3

question 9389 | Rel-17 | Standards specifications
Q: What does a UE use to determine the priority for a PUCCH transmission with multicast HARQ-ACK information? [3GPP Release 17]
Expected: option 2 | paper: Option 1 | baseline: option 2

question 9467 | Rel-18 | Standards specifications
Q: For a prioritized service, will the UE automatically override user and network disallowed RATs if there are no PLMNs on the allowed ...
Expected: option 1 | paper: Option 2 | baseline: option 1

question 9504 | Rel-17 | Standards specifications
Q: What is included in the UE CONTEXT SETUP REQUEST message in the Intra-gNB-DU handover procedure? [3GPP Release 17]
Expected: option 4 | paper: Option 1 | baseline: option 4

question 9505 | Rel-17 | Standards overview
Q: Which 3GPP specification defines the architecture, procedures, and information flows to enable edge applications over 3GPP networks? ...
Expected: option 3 | paper: Option 2 | baseline: option 3

question 9549 | Rel-18 | Standards specifications
Q: What additional information does the NWDAF collect for UPF load analytics? [3GPP Release 18]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 9571 | Rel-17 | Standards specifications
Q: How is the energy detection threshold adapted for channel access? [3GPP Release 17]
Expected: option 2 | paper: Option 4 | baseline: option 2

question 9602 | Rel-16 | Standards overview
Q: Which scenarios are supported by the 5G-RG? [3GPP Release 16]
Expected: option 1 | paper: Option 4 | baseline: option 1

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (313-320 of 329)

question 9678 | Rel-17 | Standards specifications
Q: Which identity is used for identification of cancellation in the uplink? [3GPP Release 17]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 9685 | Rel-14 | Standards specifications
Q: What is the purpose of the 'Group Reporting Guard Time'? [3GPP Release 14]
Expected: option 4 | paper: Option 2 | baseline: option 4

question 9705 | Rel-18 | Standards specifications
Q: What model does the streaming service use? [3GPP Release 18]
Expected: option 3 | paper: Option 4 | baseline: option 3

question 9719 | Rel-18 | Standards specifications
Q: What is the maximum value for the ACK missed detection probability for NPUSCH format 2 transmission with 15KHz subcarrier spacing? [3GPP ...]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 9728 | Rel-18 | Standards specifications
Q: What is the main purpose of the location registration function? [3GPP Release 18]
Expected: option 4 | paper: Option 3 | baseline: option 4

question 9751 | Rel-18 | Standards specifications
Q: Which of the following parameters may be included in the 5G VN group data? [3GPP Release 18]
Expected: option 1 | paper: Option 3 | baseline: option 1

question 9767 | Rel-18 | Standards specifications
Q: When can emergency calls be established without the need to dial a dedicated number? [3GPP Release 18]
Expected: option 5 | paper: Option 4 | baseline: option 5

question 9776 | Rel-18 | Standards specifications
Q: Which penetration loss model is applicable to RMa? [3GPP Release 18]
Expected: option 1 | paper: Option 2 | baseline: option 1

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (321-328 of 329)

question 9797 | Rel-17 | Standards specifications
Q: What is the maximum end-to-end latency allowed for voice services at the edge of coverage in the 5G system? [3GPP Release 17]
Expected: option 4 | paper: Option 200 | baseline: option 4

question 9834 | Rel-17 | Standards specifications
Q: Which identity is used for UE identification temporarily used for contention resolution purposes during the random access procedure? ...
Expected: option 4 | paper: Option 2 | baseline: option 4

question 9838 | Rel-18 | Standards specifications
Q: Are the radio technologies disallowed by the HPLMN bound to the USIM? [3GPP Release 18]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 9841 | Rel-17 | Standards specifications
Q: For a PUSCH transmission scheduled by a RAR UL grant, how is the scrambling initialization of the PUSCH determined? [3GPP Release 17]
Expected: option 1 | paper: Option 2 | baseline: option 1

question 9853 | Rel-18 | Standards specifications
Q: What happens if the network detects that the called end does not support the requested call mode in a multimedia call? [3GPP Release 18]
Expected: option 1 | paper: Option 4 | baseline: option 1

question 9865 | Rel-17 | Standards overview
Q: What is the MUSIM-specific AT command specification? [3GPP Release 17]
Expected: option 2 | paper: Option 3 | baseline: option 2

question 9872 | Rel-17 | Standards overview
Q: What functionality does Management Based Activation provide? [3GPP Release 17]
Expected: option 1 | paper: Option 3 | baseline: option 1

question 9984 | Rel-14 | Standards overview
Q: Which 3GPP specification provides the security aspect for LTE support of V2X services? [3GPP Release 14]
Expected: option 2 | paper: Option 1 | baseline: option 2

Questions Paper baseline GSMA Rel-18 gets right and Paper offline misses (329-329 of 329)

question 9986 | Rel-18 | Standards specifications
Q: What functions are included in the Online Charging System (OCS)? [3GPP Release 18]
Expected: option 1 | paper: Option 5 | baseline: option 1

Questions both runs miss (1-8 of 367)

question 14 | Rel-18 | Standards specifications

Q: In online charging, how are chargeable events transformed into charging events? [3GPP Release 18]

Expected: option 2 | paper: Option 4 | baseline: option 1

question 37 | Rel-17 | Standards overview

Q: Which NGAP procedure is used for inter-system load balancing? [3GPP Release 17]

Expected: option 3 | paper: Option 2 | baseline: option 2

question 60 | Rel-17 | Standards specifications

Q: What are DCI formats with CRC scrambled by MCCH-RNTI or G-RNTI referred to as? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 80 | Rel-18 | Standards specifications

Q: What triggers the NF/NF Service Context Transfer Push procedure? [3GPP Release 18]

Expected: option 3 | paper: Option 4 | baseline: option 4

question 121 | Rel-14 | Standards specifications

Q: What is the purpose of the group identifier called 'External Group ID'? [3GPP Release 14]

Expected: option 2 | paper: Option 5 | baseline: option 3

question 185 | Rel-17 | Standards specifications

Q: How does a non-supporting UE select a core network operator to serve it in a shared network? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 206 | Rel-17 | Standards specifications

Q: What is SIPTO at the Local Network? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 249 | Rel-17 | Standards specifications

Q: What are the peak packet data rates supported by the Evolved Packet System on the radio access bearer? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 3

Questions both runs miss (9-16 of 367)

question 268 | Rel-18 | Standards specifications

Q: What criteria are considered for network broadcast geographic area coverage management? [3GPP Release 18]

Expected: option 2 | paper: Option 3 | baseline: option 3

question 282 | Rel-16 | Standards specifications

Q: Which power saving scheme achieves power consumption reduction by potentially skipping PDCCH monitoring at subsequent slots of ...

Expected: option 3 | paper: Option 1 | baseline: option 1

question 289 | Rel-18 | Standards specifications

Q: What type of authentication and authorization is required for accessing a 5G VN group? [3GPP Release 18]

Expected: option 5 | paper: Option 2 | baseline: option 3

question 384 | Rel-17 | Standards specifications

Q: What is one of the requirements for interworking between fixed access and Evolved Packet Core? [3GPP Release 17]

Expected: option 3 | paper: Option 2 | baseline: option 4

question 398 | Rel-18 | Standards specifications

Q: What inputs are required for the Nmfa3_dataManagement_Configure service operation? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 405 | Rel-14 | Standards specifications

Q: What are the enhanced RRM requirements in DRX in connected mode? [3GPP Release 14]

Expected: option 1 | paper: Option 2 | baseline: option 3

question 558 | Rel-17 | Standards specifications

Q: What is the scrambling sequence generator initialized with for a PDCCH with the CRC scrambled by G-RNTI in a common search space? [3GPP ...

Expected: option 1 | paper: Option 3 | baseline: option 5

question 596 | Rel-18 | Standards specifications

Q: What is the role of the serving network in fraud control? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 3

Questions both runs miss (17-24 of 367)

question 654 | Rel-16 | Standards overview

Q: How is the LMF connected to the NG-RAN node in the positioning architecture? [3GPP Release 16]

Expected: option 5 | paper: Option 3 | baseline: option 3

question 674 | Rel-18 | Standards specifications

Q: Which channels are used for the performance requirements in Narrowband IoT? [3GPP Release 18]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 717 | Rel-18 | Standards specifications

Q: What happens when the Control Plane data back-off timer is running? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 761 | Rel-17 | Standards specifications

Q: In a split gNB architecture, how is RACH configuration conflict resolved? [3GPP Release 17]

Expected: option 5 | paper: Option 2 | baseline: option 3

question 813 | Rel-17 | Standards specifications

Q: When is DCP configured on the PCell? [3GPP Release 17]

Expected: option 5 | paper: Option 4 | baseline: option 4

question 815 | Rel-19 | Standards specifications

Q: What is a requirement for clock synchronisation of the 5G system? [3GPP Release 19]

Expected: option 5 | paper: Option 1 | baseline: option 1

question 823 | Rel-16 | Standards overview

Q: What is the purpose of the Service Enabler Architecture Layer (SEAL) for Verticals? [3GPP Release 16]

Expected: option 2 | paper: Option 3 | baseline: option 3

question 855 | Rel-17 | Standards specifications

Q: What is the maximum value of E-UTRA carrier frequency? [3GPP Release 17]

Expected: option 1 | paper: Option 2 | baseline: option 2

Questions both runs miss (25-32 of 367)

question 856 | Rel-17 | Standards specifications

Q: What is the numerology based on for PSS, SSS, and PBCH? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 2

question 888 | Rel-14 | Standards overview

Q: What does the Robust Call Setup for VoLTE subscriber in LTE Work Item aim to address? [3GPP Release 14]

Expected: option 1 | paper: Option 3 | baseline: option 2

question 890 | Rel-18 | Standards specifications

Q: What is the purpose of the User Service Identity Module (USIM)? [3GPP Release 18]

Expected: option 2 | paper: Option 5 | baseline: option 5

question 892 | Rel-17 | Standards specifications

Q: What is the purpose of Immediate Divert in IP-PBX? [3GPP Release 17]

Expected: option 1 | paper: Option 5 | baseline: option 5

question 955 | Rel-18 | Standards specifications

Q: What is the role of the home environment in the delegation of charging authority? [3GPP Release 18]

Expected: option 4 | paper: Option 1 | baseline: option 2

question 976 | Rel-17 | Standards specifications

Q: What is an acceptable cell? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 1029 | Rel-18 | Standards specifications

Q: What should URSP rules based on AF guidance not be set as? [3GPP Release 18]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 1066 | Rel-18 | Standards specifications

Q: How can power saving be enabled during active-time? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 2

Questions both runs miss (33-40 of 367)

question 1134 | Rel-18 | Standards specifications

Q: When does the NG-RAN perform NG-RAN paging before reporting the UE's location? [3GPP Release 18]

Expected: option 3 | paper: Option 4 | baseline: option 2

question 1144 | Rel-15 | Standards overview

Q: Which specifications define the Network Resource Model (NRM) information service and solution set for 5G networks and network slicing? ...

Expected: option 1 | paper: Option 5 | baseline: option 5

question 1161 | Rel-18 | Standards specifications

Q: What is the purpose of fraud control in the home environment? [3GPP Release 18]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 1185 | Rel-17 | Standards specifications

Q: What is the maximum number of CBR range configurations for sidelink communication congestion control? [3GPP Release 17]

Expected: option 1 | paper: Option 12 | baseline: option 2

question 1196 | Rel-18 | Standards specifications

Q: Which standard defines the integration of the 5G System into a TSN data network (DN)? [3GPP Release 18]

Expected: option 5 | paper: Option 2 | baseline: option 4

question 1226 | Rel-18 | Standards specifications

Q: What does the SMF do when it receives the enabling request for analytics information exposure from a UE? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 5

question 1258 | Rel-16 | Standards overview

Q: What is the purpose of the xMB API? [3GPP Release 16]

Expected: option 4 | paper: Option 1 | baseline: option 1

question 1274 | Rel-18 | Standards specifications

Q: What is the SNR target for higher CBWs assuming 16 and 20 dB? [3GPP Release 18]

Expected: option 3 | paper: Option 4 | baseline: option 2

Questions both runs miss (41-48 of 367)

question 1311 | Rel-17 | Standards specifications

Q: What is the role of a Relay Node (RN) in E-UTRAN? [3GPP Release 17]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 1321 | Rel-18 | Standards specifications

Q: What is the purpose of the N26 interface in the non-roaming architecture for interworking between 5GS and EPC? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 3

question 1391 | Rel-16 | Standards overview

Q: What are the high-level features specified for 5G Location Services? [3GPP Release 16]

Expected: option 2 | paper: Option 3 | baseline: option 3

question 1411 | Rel-18 | Standards specifications

Q: What does the NWDAF containing MTLF consider when using untrusted AF(s) as data sources? [3GPP Release 18]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 1425 | Rel-17 | Standards specifications

Q: What does a '0' value for a bit of the bitmap, provided by dormancyGroupOutsideActiveTime, indicate? [3GPP Release 17]

Expected: option 4 | paper: Option 3 | baseline: option 3

question 1426 | Rel-17 | Standards specifications

Q: What does the 5G system need to support for the tactile and multi-modal communication service? [3GPP Release 17]

Expected: option 2 | paper: Option 3 | baseline: option 3

question 1449 | Rel-18 | Standards specifications

Q: What is the relative increase in cable loss per meter from 43.5 GHz to 71 GHz? [3GPP Release 18]

Expected: option 1 | paper: Option 4 | baseline: option 2

question 1458 | Rel-18 | Standards specifications

Q: What is the polarization slant angle for a purely vertically polarized antenna element? [3GPP Release 18]

Expected: option 1 | paper: Option 4 | baseline: option 4

Questions both runs miss (49-56 of 367)

question 1479 | Rel-18 | Standards specifications

Q: Which event notification is used to monitor the movement of candidate UEs in/out of the monitoring area? [3GPP Release 18]

Expected: option 4 | paper: Option 1 | baseline: option 1

question 1480 | Rel-18 | Standards specifications

Q: What is the purpose of the HR-SBO PDU Session in roaming? [3GPP Release 18]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 1508 | Rel-17 | Standards specifications

Q: What does the UE ignore regarding cell access restrictions for cell reselection when camping on E-UTRA connected to 5GC? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 1545 | Rel-17 | Standards specifications

Q: What is a multi-modal communication service? [3GPP Release 17]

Expected: option 3 | paper: Option 4 | baseline: option 4

question 1550 | Rel-17 | Standards specifications

Q: What is one of the challenges of energy saving schemes in the radio access network (RAN)? [3GPP Release 17]

Expected: option 1 | paper: Option 5 | baseline: option 5

question 1583 | Rel-14 | Standards specifications

Q: What is the purpose of the WI 'OAM14-FILMEAS'? [3GPP Release 14]

Expected: option 1 | paper: Option 5 | baseline: option 5

question 1703 | Rel-14 | Standards specifications

Q: What is the capacity of eNB-ID in a Macro eNB? [3GPP Release 14]

Expected: option 1 | paper: Option 2 | baseline: option 3

question 1721 | Rel-17 | Standards specifications

Q: What is the function of a Base Transceiver Station (BTS)? [3GPP Release 17]

Expected: option 3 | paper: Option 2 | baseline: option 2

Questions both runs miss (57-64 of 367)

question 1724 | Rel-17 | Standards overview

Q: How is service continuity supported for specific slice(s)? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 4

question 1728 | Rel-17 | Standards specifications

Q: What does the Location Service Request report provide? [3GPP Release 17]

Expected: option 2 | paper: Option 4 | baseline: option 1

question 1734 | Rel-18 | Standards specifications

Q: Which of the following options is used by NWDAF to collect input data on the number of UEs registered in a S-NSSAI or S-NSSAI and NSI ID ...

Expected: option 4 | paper: Option 2 | baseline: option 2

question 1750 | Rel-17 | Standards specifications

Q: Which reference point is used to force traffic between a WLAN UE and PDG to go through the WAG? [3GPP Release 17]

Expected: option 5 | paper: Option 4 | baseline: option 4

question 1758 | Rel-18 | Standards specifications

Q: What triggers the UE mobility and AF relocation? [3GPP Release 18]

Expected: option 3 | paper: Option 1 | baseline: option 2

question 1855 | Rel-17 | Standards specifications

Q: What additional functions does the eNB support in case of SIPTO@LN with collocated L-GW? [3GPP Release 17]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 1918 | Rel-17 | Standards specifications

Q: When is the minimum applicable scheduling offset restriction applied? [3GPP Release 17]

Expected: option 1 | paper: Option 5 | baseline: option 2

question 1981 | Rel-18 | Standards specifications

Q: What happens when the Target NF/NF Service triggers the NF/NF Service Context Transfer Pull procedure? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 2

Questions both runs miss (65-72 of 367)

question 1988 | Rel-18 | Standards specifications

Q: Which supplementary service is unaffected by the user's ability to undergo voice call continuity? [3GPP Release 18]

Expected: option 3 | paper: Option 1 | baseline: option 2

question 2025 | Rel-17 | Standards specifications

Q: Which identity is used for UE identification temporarily used for scheduling during the random access procedure? [3GPP Release 17]

Expected: option 3 | paper: Option 2 | baseline: option 2

question 2048 | Rel-18 | Standards specifications

Q: What is the purpose of the ISIM-specific information? [3GPP Release 18]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 2060 | Rel-18 | Standards specifications

Q: When does authentication (charging/billing network) occur in order to get access to services? [3GPP Release 18]

Expected: option 1 | paper: Option 5 | baseline: option 5

question 2061 | Rel-17 | Standards specifications

Q: What is a Paging Occasion (PO)? [3GPP Release 17]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 2106 | Rel-18 | Standards specifications

Q: Which entity may redirect the AF to a local NEF? [3GPP Release 18]

Expected: option 4 | paper: Option 3 | baseline: option 1

question 2145 | Rel-18 | Standards specifications

Q: What is the provision of services? [3GPP Release 18]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 2152 | Rel-14 | Standards overview

Q: What two functionalities were introduced in the enhancement of the Dedicated Core Networks selection mechanism? [3GPP Release 14]

Expected: option 1 | paper: Option 2 | baseline: option 2

Questions both runs miss (73-80 of 367)

question 2174 | Rel-17 | Standards overview

Q: What aspects of the Disaster Roaming service are specified in TS 22.011 and TS 22.261? [3GPP Release 17]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 2185 | Rel-18 | Standards specifications

Q: Which frequency range should the channel model support? [3GPP Release 18]

Expected: option 5 | paper: Option 3 | baseline: option 4

question 2214 | Rel-17 | Standards specifications

Q: What can a Target UE subscription profile specify? [3GPP Release 17]

Expected: option 1 | paper: Option 5 | baseline: option 5

question 2216 | Rel-17 | Standards specifications

Q: What is a Premises Radio Access Station (PRAS)? [3GPP Release 17]

Expected: option 4 | paper: Option 1 | baseline: option 1

question 2254 | Rel-16 | Standards specifications

Q: What is the purpose of the PDCCH-based power saving signal/channel for wake-up purpose? [3GPP Release 16]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 2268 | Rel-17 | Standards specifications

Q: What physical layer measurement quantity can be used for sidelink? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 2278 | Rel-15 | Standards overview

Q: What type of bearer is used for IMS Signalling and IMS voice in the NSA architecture? [3GPP Release 15]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 2352 | Rel-18 | Standards specifications

Q: What is the responsibility of the NG-RAN regarding the maximum UP integrity protection data rate? [3GPP Release 18]

Expected: option 3 | paper: Option 2 | baseline: option 4

Questions both runs miss (81-88 of 367)

question 2355 | Rel-17 | Standards specifications

Q: How is the SCG of the UE suspended in RRC_INACTIVE state? [3GPP Release 17]

Expected: option 5 | paper: Option 1 | baseline: option 1

question 2367 | Rel-17 | Standards specifications

Q: What authentication method does the 5G system support for legacy non-3GPP devices accessing a 5G LAN-VN? [3GPP Release 17]

Expected: option 3 | paper: Option 4 | baseline: option 4

question 2382 | Rel-16 | Standards specifications

Q: What are the power components recommended to be considered for RRM measurement power saving evaluation in the CONNECTED state? [3GPP ...]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 2396 | Rel-18 | Standards specifications

Q: Which entities are dedicated for interworking between 5GS and EPC? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 3

question 2408 | Rel-17 | Standards specifications

Q: What is the function of the Home Subscriber Server (HSS)? [3GPP Release 17]

Expected: option 1 | paper: Option 2 | baseline: option 4

question 2523 | Rel-18 | Standards specifications

Q: What is the purpose of N19-based traffic forwarding? [3GPP Release 18]

Expected: option 1 | paper: Option 5 | baseline: option 3

question 2533 | Rel-18 | Standards specifications

Q: What can the NW configure for NES-capable UEs? [3GPP Release 18]

Expected: option 3 | paper: Option 4 | baseline: option 4

question 2537 | Rel-17 | Standards specifications

Q: What is the polarization of a single polarized antenna? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 4

Questions both runs miss (89-96 of 367)

question 2590 | Rel-15 | Standards overview

Q: What is the purpose of the Flow Based Charging (FBC) in 5G? [3GPP Release 15]

Expected: option 4 | paper: Option 3 | baseline: option 2

question 2652 | Rel-17 | Standards specifications

Q: What is the main function of a Radio Network Controller (RNC)? [3GPP Release 17]

Expected: option 1 | paper: Option 4 | baseline: option 4

question 2666 | Rel-18 | Standards specifications

Q: What control mechanism allows/prevents UEs from accessing the network based on their capabilities? [3GPP Release 18]

Expected: option 3 | paper: Option 2 | baseline: option 2

question 2782 | Rel-17 | Standards overview

Q: How does a Multi-USIM UE modify the timing of paging occasions in 5GS? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 5

question 2783 | Rel-17 | Standards specifications

Q: What is the purpose of the periodic CSI-RS resource configuration indexes? [3GPP Release 17]

Expected: option 1 | paper: Option 2 | baseline: option 3

question 2788 | Rel-17 | Standards specifications

Q: How is the starting position of a bandwidth part defined? [3GPP Release 17]

Expected: option 4 | paper: Option 1 | baseline: option 1

question 2835 | Rel-18 | Standards specifications

Q: What is the purpose of NWDAF in the 5G system architecture? [3GPP Release 18]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 2898 | Rel-18 | Standards specifications

Q: What factors are considered when deciding on service delivery? [3GPP Release 18]

Expected: option 4 | paper: Option 5 | baseline: option 5

Questions both runs miss (97-104 of 367)

question 2947 | Rel-17 | Standards specifications

Q: How do non-supporting UEs handle the broadcast system information in a shared network? [3GPP Release 17]

Expected: option 4 | paper: Option 3 | baseline: option 2

question 2977 | Rel-14 | Standards specifications

Q: What does the QoE measurement configuration received from OAM or CN encapsulated in? [3GPP Release 14]

Expected: option 5 | paper: Option 1 | baseline: option 3

question 3046 | Rel-17 | Standards specifications

Q: How does the RNC indicate the UE selected core network operator to the CN for supporting UEs? [3GPP Release 17]

Expected: option 3 | paper: Option 5 | baseline: option 1

question 3072 | Rel-17 | Standards specifications

Q: When does a UE start and stop PDCCH monitoring according to search space sets with different group indexes? [3GPP Release 17]

Expected: option 5 | paper: Option 1 | baseline: option 3

question 3103 | Rel-18 | Standards specifications

Q: What information is incorporated into the CDRs produced by IMS network elements for inter operator accounting purposes? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 3

question 3108 | Rel-18 | Standards specifications

Q: What does the NEF (PFDF) do after determining whether to create/update/delete PFDs? [3GPP Release 18]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 3143 | Rel-18 | Standards specifications

Q: What conditions must be met for voice call continuity during emergency calls? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 3189 | Rel-18 | Standards specifications

Q: What does the NG-RAN do immediately following step 1a of the Connection Inactive procedure? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

Questions both runs miss (105-112 of 367)

question 3216 | Rel-18 | Standards specifications

Q: Who decides on the service delivery in a roaming scenario? [3GPP Release 18]

Expected: option 3 | paper: Option 1 | baseline: option 4

question 3222 | Rel-16 | Standards overview

Q: What is one major limitation of Release 15 in 5GC that Release 16 Network Slicing addresses? [3GPP Release 16]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 3236 | Rel-18 | Standards specifications

Q: What controls the additional behavior of the SMF for 3GPP PS Data Off? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 3249 | Rel-14 | Standards overview

Q: What is the purpose of the S8HR architecture for VoLTE roaming? [3GPP Release 14]

Expected: option 4 | paper: Option 1 | baseline: option 1

question 3256 | Rel-17 | Standards overview

Q: How can UE power saving be enabled by relaxing measurements for RLM/BFD? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 3294 | Rel-17 | Standards specifications

Q: What is the purpose of the IM-GSN in a GLR-equipped VPLMN? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 3297 | Rel-15 | Standards overview

Q: What is the impact of mobility between a 5G core network and an EPC (4G) on the user experience? [3GPP Release 15]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 3309 | Rel-18 | Standards specifications

Q: Which specification defines Lawful Interception functionality? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 3

Questions both runs miss (113-120 of 367)

question 3316 | Rel-19 | Standards specifications

Q: In addition to 5G-based Ethernet links, what other ethernet transports should the 3GPP system support clock synchronization for high ...

Expected: option 4 | paper: Option 3 | baseline: option 3

question 3342 | Rel-17 | Standards specifications

Q: In which case is the HARQ-ACK message transmitted on PUCCH? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 3352 | Rel-17 | Standards specifications

Q: How does the UE determine the p0-PUCCH-Value value if it is not provided any of pdsch-HARQ-ACK-Codebook? [3GPP Release 17]

Expected: option 3 | paper: Option 5 | baseline: option 5

question 3391 | Rel-18 | Standards specifications

Q: How does the NWDAF provide new analytics to the NF in continuous reporting? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 5

question 3409 | Rel-17 | Standards specifications

Q: Which specifications describe the access technologies offered by the BSS? [3GPP Release 17]

Expected: option 3 | paper: Option 2 | baseline: option 1

question 3434 | Rel-14 | Standards specifications

Q: What does the demodulation enhancement feature in LTE enable the UE to do? [3GPP Release 14]

Expected: option 2 | paper: Option 3 | baseline: option 4

question 3439 | Rel-18 | Standards specifications

Q: Which evaluation method is considered as the baseline? [3GPP Release 18]

Expected: option 2 | paper: Option 3 | baseline: option 3

question 3447 | Rel-18 | Standards specifications

Q: What is the typical height at which the BSs are mounted in the indoor scenario? [3GPP Release 18]

Expected: option 3 | paper: Option 4 | baseline: option 4

Questions both runs miss (121-128 of 367)

question 3473 | Rel-17 | Standards specifications

Q: Which of the following physical signals are used by the physical layer but do not carry information originating from higher layers? ...

Expected: option 3 | paper: Option 4 | baseline: option 1

question 3474 | Rel-17 | Standards specifications

Q: Which protocol stack is used for the S5 interface? [3GPP Release 17]

Expected: option 5 | paper: Option 4 | baseline: option 4

question 3488 | Rel-16 | Standards overview

Q: What is the purpose of the work item 5G_HYPOS? [3GPP Release 16]

Expected: option 1 | paper: Option 5 | baseline: option 5

question 3527 | Rel-18 | Standards specifications

Q: What information triggers the activation or deactivation of access stratum time distribution for a UE? [3GPP Release 18]

Expected: option 3 | paper: Option 4 | baseline: option 4

question 3547 | Rel-17 | Standards specifications

Q: When is the SN Modification Confirm message sent to the MN? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 3558 | Rel-18 | Standards specifications

Q: Which protocol(s) crossing the Rf reference point should support real-time transactions? [3GPP Release 18]

Expected: option 3 | paper: Option 4 | baseline: option 2

question 3559 | Rel-17 | Standards specifications

Q: What is the definition of a resource unit for multi-tone NPUSCH with UL-SCH transmission? [3GPP Release 17]

Expected: option 3 | paper: Option 4 | baseline: option 5

question 3569 | Rel-18 | Standards specifications

Q: How are charges paid to the adjacent party in the settlement of charges? [3GPP Release 18]

Expected: option 5 | paper: Option 2 | baseline: option 2

Questions both runs miss (129-136 of 367)

question 3572 | Rel-17 | Standards overview

Q: What does the 5G LAN VN group service charging specify? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 3585 | Rel-18 | Standards specifications

Q: What does the NWDAF notify in the procedure of providing PDU Session traffic analytics? [3GPP Release 18]

Expected: option 2 | paper: Option 4 | baseline: option 1

question 3597 | Rel-17 | Standards specifications

Q: What is the duration of a frame? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 3615 | Rel-17 | Standards specifications

Q: What information shall be provided to the LCS client? [3GPP Release 17]

Expected: option 1 | paper: Option 4 | baseline: option 4

question 3630 | Rel-17 | Standards specifications

Q: What release cause is indicated when the UE fails the mobility from NR procedure? [3GPP Release 17]

Expected: option 3 | paper: Option 4 | baseline: option 4

question 3722 | Rel-14 | Standards overview

Q: How many DL HARQ processes are introduced for UEs supporting full-duplex FDD operation? [3GPP Release 14]

Expected: option 3 | paper: Option 8 | baseline: option 2

question 3740 | Rel-14 | Standards specifications

Q: What is the capacity of Cell-ID in an eNB? [3GPP Release 14]

Expected: option 4 | paper: Option 1 | baseline: option 3

question 3751 | Rel-17 | Standards specifications

Q: How can a UE be indicated to transmit a PSFCH with HARQ-ACK information? [3GPP Release 17]

Expected: option 4 | paper: Option 2 | baseline: option 2

Questions both runs miss (137-144 of 367)

question 3787 | Rel-17 | Standards overview

Q: What is the purpose of the Work Item 'Enhancement of Private Network support for NG-RAN'? [3GPP Release 17]

Expected: option 5 | paper: Option 4 | baseline: option 4

question 3788 | Rel-19 | Standards specifications

Q: What is the main purpose of the 5G system in supporting cyber-physical control applications using wireless indirect network connection? ...

Expected: option 2 | paper: Option 3 | baseline: option 3

question 3793 | Rel-17 | Standards specifications

Q: When a UE performs simultaneous SL and UL transmissions, which link has higher priority? [3GPP Release 17]

Expected: option 4 | paper: Option 3 | baseline: option 3

question 3813 | Rel-17 | Standards specifications

Q: Which field is ignored by UEs supporting crs-IntfMitig while crs-IntfMitigEnabled is included in SIB1? [3GPP Release 17]

Expected: option 4 | paper: Option 3 | baseline: option 3

question 3844 | Rel-17 | Standards specifications

Q: What is the indication for a restriction on emergency calls? [3GPP Release 17]

Expected: option 5 | paper: Option 1 | baseline: option 1

question 3853 | Rel-18 | Standards specifications

Q: What is the purpose of EAS Relocation on Release 16 capabilities? [3GPP Release 18]

Expected: option 4 | paper: Option 3 | baseline: option 3

question 3883 | Rel-17 | Standards specifications

Q: What is the inter RAT mobility characteristic of handover from E-UTRA to NR? [3GPP Release 17]

Expected: option 4 | paper: Option 2 | baseline: option 1

question 3906 | Rel-17 | Standards specifications

Q: What does SIPTO@LN stand for? [3GPP Release 17]

Expected: option 2 | paper: Option 3 | baseline: option 3

Questions both runs miss (145-152 of 367)

question 3918 | Rel-17 | Standards specifications

Q: What is the redundancy version number used for the initial transmission or autonomous retransmission of an initial transport block for a ...

Expected: option 1 | paper: Option 0 | baseline: unparsed

question 3937 | Rel-17 | Standards overview

Q: What is specified in TS 24.588 related to V2X services? [3GPP Release 17]

Expected: option 2 | paper: Option 3 | baseline: option 3

question 3964 | Rel-18 | Standards specifications

Q: What happens when a call undergoes voice call continuity and becomes barred in the target domain/system? [3GPP Release 18]

Expected: option 3 | paper: Option 2 | baseline: option 2

question 4036 | Rel-15 | Standards overview

Q: What does the Nchf_ConvergedCharging service Create Operation achieve for SMS Charging in the 5G System Architecture Phase 1? [3GPP ...

Expected: option 1 | paper: Option 3 | baseline: option 3

question 4037 | Rel-18 | Standards specifications

Q: When does the TSCTSF control the (g)PTP-based time synchronization service without AF request? [3GPP Release 18]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 4081 | Rel-18 | Standards specifications

Q: What message is sent by the MS to the network to request the release of a GMM context? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 4089 | Rel-17 | Standards overview

Q: Which document specifies the MUSIM-specific rejection cause for EPS? [3GPP Release 17]

Expected: option 5 | paper: Option 1 | baseline: option 3

question 4117 | Rel-15 | Standards overview

Q: Which feature was introduced in Rel-15 to improve transmission reliability in Carrier Aggregation (CA) for mode-4? [3GPP Release 15]

Expected: option 3 | paper: Option 5 | baseline: option 5

Questions both runs miss (153-160 of 367)

question 4146 | Rel-17 | Standards specifications

Q: What are examples of management services that can be produced by an entity in a mobile network? [3GPP Release 17]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 4181 | Rel-17 | Standards specifications

Q: What additional function does the MME support in case of SIPTO@LN with stand-alone gateway? [3GPP Release 17]

Expected: option 5 | paper: Option 3 | baseline: option 3

question 4234 | Rel-14 | Standards overview

Q: What measurements does the UE need to make in RRC_IDLE mode for E-CID? [3GPP Release 14]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 4242 | Rel-17 | Standards specifications

Q: How is power saving enabled during active-time? [3GPP Release 17]

Expected: option 1 | paper: Option 4 | baseline: option 2

question 4282 | Rel-18 | Standards specifications

Q: What is the purpose of the MPS system? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 4293 | Rel-17 | Standards specifications

Q: Which carrier has the highest cell reselection priority for sidelink operation? [3GPP Release 17]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 4314 | Rel-17 | Standards specifications

Q: Which group focuses on defining and parameterizing emerging usage scenarios for mmWave propagation channels? [3GPP Release 17]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 4328 | Rel-18 | Standards specifications

Q: What is the role of the Master RAN Node in Dual Connectivity? [3GPP Release 18]

Expected: option 3 | paper: Option 5 | baseline: option 5

Questions both runs miss (161-168 of 367)

question 4372 | Rel-18 | Standards specifications

Q: What criteria are considered for network broadcast capacity assignment? [3GPP Release 18]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 4397 | Rel-17 | Standards specifications

Q: How is the relationship between radiation field and power pattern defined in general? [3GPP Release 17]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 4401 | Rel-17 | Standards specifications

Q: What does the eNodeB use the selected core network information for? [3GPP Release 17]

Expected: option 4 | paper: Option 3 | baseline: option 3

question 4431 | Rel-14 | Standards specifications

Q: What is the purpose of the TRMS metric in LTE? [3GPP Release 14]

Expected: option 1 | paper: Option 3 | baseline: option 2

question 4468 | Rel-17 | Standards specifications

Q: What transmission technique is used to multiplex transport channels using MBSFN and non-MBSFN transmission? [3GPP Release 17]

Expected: option 3 | paper: Option 4 | baseline: option 4

question 4548 | Rel-18 | Standards specifications

Q: What is the potential impact of UE/TRP PCO errors on NR carrier phase positioning accuracy? [3GPP Release 18]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 4581 | Rel-17 | Standards specifications

Q: What are the TDL models used for? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 4620 | Rel-17 | Standards specifications

Q: Which interface is used to forward short messages in the network with the GLR in case of SMS transfer over GPRS? [3GPP Release 17]

Expected: option 4 | paper: Option 2 | baseline: option 2

Questions both runs miss (169-176 of 367)

question 4632 | Rel-18 | Standards specifications

Q: Which signaling procedure is introduced to support SL Positioning? [3GPP Release 18]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 4677 | Rel-19 | Standards specifications

Q: What are the main control functions of automated control systems? [3GPP Release 19]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 4683 | Rel-14 | Standards overview

Q: What is the purpose of MBMS-APIs? [3GPP Release 14]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 4687 | Rel-18 | Standards specifications

Q: What does BA stand for in the context of RRC? [3GPP Release 18]

Expected: option 5 | paper: Option 3 | baseline: option 3

question 4688 | Rel-18 | Standards specifications

Q: What mobility is supported in handover with SRVCC operation? [3GPP Release 18]

Expected: option 3 | paper: Option 5 | baseline: option 1

question 4718 | Rel-17 | Standards specifications

Q: What is the limitation of indirect data forwarding for the user plane in inter-System data forwarding from EPS to 5GS? [3GPP Release 17]

Expected: option 3 | paper: Option 5 | baseline: option 1

question 4762 | Rel-17 | Standards specifications

Q: What does a UE monitor for detection of DCI format 0_0 or DCI format 1_0 with CRC scrambled by C-RNTI for scheduling respective PUSCH ...

Expected: option 4 | paper: Option 1 | baseline: option 5

question 4803 | Rel-17 | Standards specifications

Q: What is included in the cancellation of a PUSCH transmission for a serving cell? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 4

Questions both runs miss (177-184 of 367)

question 4812 | Rel-17 | Standards overview

Q: What is the purpose of the Network notification objective introduced by MUSIM for LTE/NR? [3GPP Release 17]

Expected: option 4 | paper: Option 2 | baseline: option 2

question 4881 | Rel-15 | Standards overview

Q: Which of the following is NOT supported by PDCP packet duplication? [3GPP Release 15]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 4893 | Rel-17 | Standards specifications

Q: What is the role of Management Data Analytics Service (MDAS) in the MDA? [3GPP Release 17]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 4918 | Rel-18 | Standards specifications

Q: Which entity takes precedence in determining the User Plane Security Policy? [3GPP Release 18]

Expected: option 4 | paper: Option 1 | baseline: option 1

question 4931 | Rel-18 | Standards specifications

Q: Which delivery option(s) are available in Data Delivery via the DCCF or NWDAF? [3GPP Release 18]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 4946 | Rel-18 | Standards specifications

Q: What does NWDAF provide to consumer NF or OAM based on the collected network data? [3GPP Release 18]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 4958 | Rel-18 | Standards specifications

Q: What is the behavior of a mobile station in the MM IDLE state with service state NO IMSI? [3GPP Release 18]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 4992 | Rel-18 | Standards specifications

Q: What is the minimum requirement for OTA occupied bandwidth for each carrier? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 3

Questions both runs miss (185-192 of 367)

question 5003 | Rel-18 | Standards specifications

Q: Which state exists when the network has received an answer but the network has not yet awarded the call? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 5034 | Rel-17 | Standards specifications

Q: How can UE power saving be achieved in RRC_IDLE/RRC_INACTIVE? [3GPP Release 17]

Expected: option 2 | paper: Option 3 | baseline: option 3

question 5056 | Rel-17 | Standards specifications

Q: Which measurements are performed for intra- and inter-frequency handover? [3GPP Release 17]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 5067 | Rel-17 | Standards specifications

Q: In what market sector are 3GPP networks expected to become an important tool? [3GPP Release 17]

Expected: option 2 | paper: Option 4 | baseline: option 5

question 5087 | Rel-17 | Standards specifications

Q: Which of the following is true about cell reselection between NR RRC_IDLE and E-UTRA RRC_IDLE? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 5091 | Rel-17 | Standards specifications

Q: What message does the UE respond with after receiving the RRCSetup message? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 5108 | Rel-17 | Standards overview

Q: What is AKMA in the context of 5G security? [3GPP Release 17]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 5135 | Rel-18 | Standards specifications

Q: What does the SMF do before retrieving PFDs from the NEF (PFDF)? [3GPP Release 18]

Expected: option 2 | paper: Option 4 | baseline: option 3

Questions both runs miss (193-200 of 367)

question 5244 | Rel-17 | Standards specifications

Q: What control does the UE subscriber have over privacy for value-added services? [3GPP Release 17]

Expected: option 3 | paper: Option 2 | baseline: option 2

question 5247 | Rel-18 | Standards specifications

Q: What does the NWDAF provide in the response or notification on 'QoS Sustainability'? [3GPP Release 18]

Expected: option 3 | paper: Option 5 | baseline: option 5

question 5255 | Rel-17 | Standards specifications

Q: What does the UE CONTEXT MODIFICATION REQUEST message include in the intra-CU topology adaptation procedure in SA? [3GPP Release 17]

Expected: option 1 | paper: Option 2 | baseline: option 5

question 5318 | Rel-16 | Standards overview

Q: What is the purpose of the enhancement of the 3GPP management system? [3GPP Release 16]

Expected: option 4 | paper: Option 5 | baseline: option 3

question 5325 | Rel-17 | Standards specifications

Q: What does the UE assume about the DL PRS from the serving cell? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 5379 | Rel-17 | Standards specifications

Q: Where is the PCI Optimization Function specified? [3GPP Release 17]

Expected: option 3 | paper: Option 4 | baseline: option 2

question 5392 | Rel-17 | Standards specifications

Q: What is used for power control in sidelink? [3GPP Release 17]

Expected: option 4 | paper: Option 2 | baseline: option 2

question 5416 | Rel-17 | Standards specifications

Q: What is the purpose of the X2 interface in Dual Connectivity? [3GPP Release 17]

Expected: option 1 | paper: Option 2 | baseline: option 2

Questions both runs miss (201-208 of 367)

question 5445 | Rel-18 | Standards specifications

Q: Which state exists when the mobile station has received an indication that remote user alerting has been initiated? [3GPP Release 18]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 5496 | Rel-17 | Standards specifications

Q: What is the symbol duration determined by a UE for PDCCH monitoring? [3GPP Release 17]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 5581 | Rel-17 | Standards specifications

Q: What accuracy of relative lateral positioning does the 3GPP system support according to requirement R.5.1-007? [3GPP Release 17]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 5601 | Rel-18 | Standards specifications

Q: What is supported for handover between gNB and ng-eNB? [3GPP Release 18]

Expected: option 3 | paper: Option 5 | baseline: option 5

question 5614 | Rel-17 | Standards specifications

Q: What is the purpose of the spatial filter in generating TDL channel models? [3GPP Release 17]

Expected: option 4 | paper: Option 2 | baseline: option 2

question 5638 | Rel-18 | Standards specifications

Q: What is the purpose of Federated Learning (FL) in the NWDAF? [3GPP Release 18]

Expected: option 3 | paper: Option 4 | baseline: option 4

question 5650 | Rel-17 | Standards specifications

Q: What are the steps needed to generate TDL models? [3GPP Release 17]

Expected: option 1 | paper: Option 4 | baseline: option 4

question 5675 | Rel-18 | Standards specifications

Q: What does the gNB do with the UE UTRA-FDD capabilities? [3GPP Release 18]

Expected: option 5 | paper: Option 1 | baseline: option 1

Questions both runs miss (209-216 of 367)

question 5681 | Rel-17 | Standards specifications

Q: What is the purpose of steering of access in the Evolved Packet System? [3GPP Release 17]

Expected: option 5 | paper: Option 4 | baseline: option 4

question 5697 | Rel-17 | Standards specifications

Q: What additional information is reported to the NAS if the UE supports E-UTRA connected to 5GC? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 2

question 5725 | Rel-17 | Standards specifications

Q: What action should the UE take if a cell is indicated as 'barred' for cell selection/reselection? [3GPP Release 17]

Expected: option 5 | paper: Option 1 | baseline: option 1

question 5791 | Rel-18 | Standards specifications

Q: Which access class value is assigned to Multimedia Priority Service? [3GPP Release 18]

Expected: option 5 | paper: Option 12 | baseline: option 11

question 5797 | Rel-18 | Standards specifications

Q: Which test method uses the fixed TPMI index for EIRP measurement? [3GPP Release 18]

Expected: option 5 | paper: Option 1 | baseline: option 1

question 5802 | Rel-18 | Standards specifications

Q: When is PSCell information reported by the NG-RAN? [3GPP Release 18]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 5810 | Rel-18 | Standards specifications

Q: What do the angles bearing, downtilt, and slant represent? [3GPP Release 18]

Expected: option 1 | paper: Option 4 | baseline: option 4

question 5827 | Rel-18 | Standards specifications

Q: What does redundant transmission on N3/N9 interfaces in URLLC aim to enhance? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 5

Questions both runs miss (217-224 of 367)

question 5832 | Rel-16 | Standards specifications

Q: What are the power components recommended to be considered for RRM measurement power saving evaluation in the IDLE/INACTIVE state? [3GPP ...

Expected: option 1 | paper: Option 5 | baseline: option 3

question 5952 | Rel-17 | Standards overview

Q: What is the purpose of the Edge Enabler Client (EEC) in enabling edge applications? [3GPP Release 17]

Expected: option 5 | paper: Option 3 | baseline: option 3

question 5981 | Rel-19 | Standards specifications

Q: What are the communication attributes in automation? [3GPP Release 19]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 5986 | Rel-18 | Standards specifications

Q: What is the purpose of 5G Access Stratum-based Time Distribution? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 6006 | Rel-18 | Standards specifications

Q: Who subscribes to analytics information of Application AI/ML traffic transmission status from the NWDAF? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 3

question 6036 | Rel-17 | Standards specifications

Q: What determines if an IAB-DU cell can transmit or receive on a symbol configured as a soft type? [3GPP Release 17]

Expected: option 2 | paper: Option 3 | baseline: option 3

question 6115 | Rel-18 | Standards specifications

Q: Which charging architecture is used for 5G Data Connectivity in Phase 1 of the 5G System Architecture? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 2

question 6124 | Rel-16 | Standards specifications

Q: What power value is recommended for loop convergence / time-frequency tracking in the IDLE/INACTIVE state? [3GPP Release 16]

Expected: option 5 | paper: Option 2 | baseline: option 4

Questions both runs miss (225-232 of 367)

question 6196 | Rel-17 | Standards specifications

Q: How does Indirect 3GPP Communication impact power consumption? [3GPP Release 17]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 6216 | Rel-18 | Standards specifications

Q: What information is provided by the SMF to the UPF during the N4 Session Establishment procedure? [3GPP Release 18]

Expected: option 3 | paper: Option 2 | baseline: option 1

question 6237 | Rel-18 | Standards specifications

Q: What is the required input for the Ndcf_ContextManagement_Update service operation? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 1

question 6253 | Rel-17 | Standards specifications

Q: For operation with RTT-based propagation delay compensation, how can the UE be configured? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 6356 | Rel-18 | Standards specifications

Q: What are the possible ordering criteria for the list of Network Performance information? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 6396 | Rel-17 | Standards specifications

Q: Which logical architectures correspond to LIPA? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 6452 | Rel-18 | Standards specifications

Q: What is the purpose of ACDC (Application Specific Congestion control for Data Communication)? [3GPP Release 18]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 6476 | Rel-17 | Standards specifications

Q: What security measure does the 3GPP system support to protect the transmission for a V2X application? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 2

Questions both runs miss (233-240 of 367)

question 6486 | Rel-17 | Standards specifications

Q: What parameter determines the maximum energy detection threshold? [3GPP Release 17]

Expected: option 3 | paper: Option 2 | baseline: option 2

question 6576 | Rel-17 | Standards specifications

Q: What is the main distinguishing factor between UMTS QoS classes? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 6587 | Rel-18 | Standards specifications

Q: What can influence the variations on per-instance NF load and resource usage? [3GPP Release 18]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 6651 | Rel-18 | Standards specifications

Q: When can CA be configured for DCP? [3GPP Release 18]

Expected: option 1 | paper: Option 4 | baseline: option 4

question 6706 | Rel-18 | Standards specifications

Q: What determines the completeness of charging information in IMS? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 6721 | Rel-17 | Standards specifications

Q: A UE monitors PDCCH for scheduling PDSCH receptions for which types of transmissions? [3GPP Release 17]

Expected: option 4 | paper: Option 1 | baseline: option 1

question 6737 | Rel-17 | Standards overview

Q: What is the purpose of Service Enabler Architecture Layer (SEAL)? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 6752 | Rel-17 | Standards specifications

Q: What is the role of the Core Network Bearer Service? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 3

Questions both runs miss (241-248 of 367)

question 6763 | Rel-17 | Standards specifications

Q: In a shared UTRAN/GERAN network, what does the RAN node do when the UE is allowed to attach? [3GPP Release 17]

Expected: option 1 | paper: Option 4 | baseline: option 2

question 6781 | Rel-17 | Standards specifications

Q: How does the BSC indicate the selected core network operator to the CN for supporting UEs? [3GPP Release 17]

Expected: option 4 | paper: Option 2 | baseline: option 2

question 6859 | Rel-17 | Standards specifications

Q: Which aspects of the Model Training function are out of RAN3 scope? [3GPP Release 17]

Expected: option 3 | paper: Option 4 | baseline: option 4

question 6882 | Rel-17 | Standards specifications

Q: What is the default treatment for positioning requests? [3GPP Release 17]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 6923 | Rel-17 | Standards specifications

Q: What is the purpose of sequence and cyclic shift hopping in PUCCH formats 0, 1, 3, and 4? [3GPP Release 17]

Expected: option 4 | paper: Option 1 | baseline: option 1

question 6965 | Rel-14 | Standards overview

Q: What is the purpose of the work item for Non-IP for Cellular IoT for EC-EGPRS? [3GPP Release 14]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 6977 | Rel-17 | Standards specifications

Q: What is one of the requirements for differentiated paging in the Evolved Packet System? [3GPP Release 17]

Expected: option 5 | paper: Option 3 | baseline: option 3

question 7012 | Rel-17 | Standards specifications

Q: Under what conditions will a UE provide a valid CSI report for the n-th triggered report? [3GPP Release 17]

Expected: option 1 | paper: Option 2 | baseline: option 2

Questions both runs miss (249-256 of 367)

question 7022 | Rel-17 | Standards specifications

Q: What does ThreshBackhRateDLWLAN, Low represent? [3GPP Release 17]

Expected: option 5 | paper: Option 4 | baseline: option 4

question 7024 | Rel-18 | Standards specifications

Q: What is the duration of a frame in the downlink? [3GPP Release 18]

Expected: option 4 | paper: Option 1 | baseline: option 1

question 7077 | Rel-18 | Standards specifications

Q: Which high-level EE KPIs are used to calculate the energy efficiency of 5G networks? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 7094 | Rel-18 | Standards specifications

Q: What lists can be stored on the SIM/USIM card for network selection? [3GPP Release 18]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 7095 | Rel-18 | Standards specifications

Q: Which architecture can support local breakout roaming? [3GPP Release 18]

Expected: option 4 | paper: Option 3 | baseline: option 3

question 7166 | Rel-17 | Standards specifications

Q: What is the purpose of the Backbone Network Service? [3GPP Release 17]

Expected: option 4 | paper: Option 3 | baseline: option 3

question 7188 | Rel-18 | Standards specifications

Q: What is the range of frequencies for the operating band unwanted emissions? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 7194 | Rel-17 | Standards specifications

Q: What is the purpose of a Local Coordinate System (LCS) in the context of a Global Coordinate System (GCS)? [3GPP Release 17]

Expected: option 5 | paper: Option 3 | baseline: option 2

Questions both runs miss (257-264 of 367)

question 7242 | Rel-17 | Standards specifications

Q: What is the channel coding scheme used for transport blocks in LTE? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 7252 | Rel-18 | Standards specifications

Q: Where is the Charging Trigger Function (CTF) located in the distributed CTF architecture for offline charging? [3GPP Release 18]

Expected: option 1 | paper: Option 4 | baseline: option 4

question 7267 | Rel-18 | Standards specifications

Q: Which measurements are agreed to be introduced for SL Positioning using SL PRS measurements? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 2

question 7296 | Rel-18 | Standards specifications

Q: When is AS security applied in the SDT procedure? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 4

question 7310 | Rel-17 | Standards specifications

Q: What is the typical height of base stations in the UMi scenario? [3GPP Release 17]

Expected: option 1 | paper: Option 5 | baseline: option 5

question 7315 | Rel-18 | Standards specifications

Q: What information does the EAS address and DNAI Mapping Information record in UDR provide? [3GPP Release 18]

Expected: option 2 | paper: Option 3 | baseline: option 3

question 7330 | Rel-17 | Standards specifications

Q: What is the purpose of the gNB-CU in the NG-RAN architecture? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 7370 | Rel-17 | Standards specifications

Q: What is the maximum number of MR-DC combinations for IDC? [3GPP Release 17]

Expected: option 3 | paper: Option 4 | baseline: option 4

Questions both runs miss (265-272 of 367)

question 7385 | Rel-18 | Standards specifications

Q: What can the Hosting E-UTRAN/NG-RAN Operator control in terms of resource usage? [3GPP Release 18]

Expected: option 1 | paper: Option 4 | baseline: option 4

question 7399 | Rel-17 | Standards specifications

Q: What does the tdd-UL-DL-ConfigurationCommon provide? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 3

question 7415 | Rel-18 | Standards specifications

Q: How is the packet delay measured for a QoS Flow in URLLC? [3GPP Release 18]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 7428 | Rel-17 | Standards specifications

Q: What can a UE be provided for scrambling the CRC of multicast DCI formats for scheduling PDSCH receptions? [3GPP Release 17]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 7435 | Rel-17 | Standards specifications

Q: Under what conditions can target UEs making an emergency call be positioned? [3GPP Release 17]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 7471 | Rel-14 | Standards overview

Q: What message does the eNB send to perform redirection to another E-UTRAN frequency? [3GPP Release 14]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 7482 | Rel-18 | Standards specifications

Q: What is the primary service state selected after power on? [3GPP Release 18]

Expected: option 3 | paper: Option 2 | baseline: option 4

question 7515 | Rel-17 | Standards specifications

Q: What is the function of the Visitor Location Register (VLR)? [3GPP Release 17]

Expected: option 4 | paper: Option 5 | baseline: option 5

Questions both runs miss (273-280 of 367)

question 7518 | Rel-18 | Standards specifications

Q: What is the purpose of the General requirements in the application layer architecture? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 7561 | Rel-18 | Standards specifications

Q: What are the steps involved in the procedure for NWDAF to derive slice load analytics? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 7587 | Rel-17 | Standards specifications

Q: How is SIPTO@LN PDN connection released in case of a handover with collocated L-GW? [3GPP Release 17]

Expected: option 5 | paper: Option 3 | baseline: option 3

question 7636 | Rel-18 | Standards specifications

Q: When can Path update signaling related to Dual Connectivity and UPF re-allocation occur? [3GPP Release 18]

Expected: option 4 | paper: Option 3 | baseline: option 3

question 7742 | Rel-17 | Standards specifications

Q: What does a supporting UE display as the network name in a shared network? [3GPP Release 17]

Expected: option 4 | paper: Option 3 | baseline: option 3

question 7853 | Rel-18 | Standards specifications

Q: What inputs are required for the Nmfafe_3caDataManagement_Fetch service operation? [3GPP Release 18]

Expected: option 4 | paper: Option 3 | baseline: option 3

question 7866 | Rel-17 | Standards specifications

Q: Which symbols are included in the last slots of a slot configuration period? [3GPP Release 17]

Expected: option 2 | paper: Option 3 | baseline: option 3

question 7875 | Rel-18 | Standards specifications

Q: Which solutions have been specified to support highly reliable and low latency communication for LTE? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

Questions both runs miss (281-288 of 367)

question 7878 | Rel-18 | Standards specifications

Q: Which protocol(s) crossing the Ro reference point should support real-time transactions? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 2

question 7884 | Rel-18 | Standards specifications

Q: Which transmission scheme is used for PDSCH? [3GPP Release 18]

Expected: option 3 | paper: Option 2 | baseline: option 4

question 7913 | Rel-16 | Standards overview

Q: What is the purpose of PC5-RRC in NR V2X sidelink? [3GPP Release 16]

Expected: option 3 | paper: Option 4 | baseline: option 4

question 7929 | Rel-18 | Standards specifications

Q: What happens when a PDU Session with UP confidentiality protection set to Required is handed over to EPS? [3GPP Release 18]

Expected: option 5 | paper: Option 3 | baseline: option 4

question 7956 | Rel-17 | Standards specifications

Q: In which phase does MDA identify ongoing issues and potential risks? [3GPP Release 17]

Expected: option 5 | paper: Option 2 | baseline: option 1

question 7975 | Rel-18 | Standards specifications

Q: What operation does the UDM use to acknowledge the UE-AMF received the Steering of Roaming information? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 7999 | Rel-18 | Standards specifications

Q: What is the max SNR increase for 66 PRB allocation compared to 264 PRBs? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 3

question 8027 | Rel-17 | Standards overview

Q: How does the network provide the paging cause field for voice service to a Multi-USIM UE? [3GPP Release 17]

Expected: option 5 | paper: Option 2 | baseline: option 2

Questions both runs miss (289-296 of 367)

question 8028 | Rel-18 | Standards specifications

Q: What determines the configuration of Dual Connectivity for a Data Radio Bearer? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 8064 | Rel-18 | Standards specifications

Q: When does a mobile station enter the GMM-DEREGISTERED state? [3GPP Release 18]

Expected: option 4 | paper: Option 3 | baseline: option 2

question 8082 | Rel-16 | Standards specifications

Q: What is the power saving gain range for the power saving schemes with UE adaptation to BWP switching? [3GPP Release 16]

Expected: option 4 | paper: Option 2 | baseline: option 2

question 8086 | Rel-15 | Standards overview

Q: Which specifications define the charging scenario, charging functionalities, and the Message format of the Common Data structure of ...

Expected: option 1 | paper: Option 2 | baseline: option 2

question 8096 | Rel-17 | Standards specifications

Q: What can be used for intra-system inter-RAT handover if the UE is connected to the 5GC of the source E-UTRA cell? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 8114 | Rel-17 | Standards overview

Q: What does the UE provide to the AS for slice aware cell reselection? [3GPP Release 17]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 8138 | Rel-17 | Standards specifications

Q: When can a gNB transmit a DL transmission(s) on a channel after initiating a channel occupancy? [3GPP Release 17]

Expected: option 3 | paper: Option 2 | baseline: option 1

question 8210 | Rel-18 | Standards specifications

Q: What is the purpose of a Local Coordinate System (LCS)? [3GPP Release 18]

Expected: option 3 | paper: Option 2 | baseline: option 2

Questions both runs miss (297-304 of 367)

question 8231 | Rel-18 | Standards specifications

Q: What is the purpose of the Non-Uniform TRP Measurement Grids? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 8307 | Rel-18 | Standards specifications

Q: What functions should the eMBMS service layer support for TV services? [3GPP Release 18]

Expected: option 3 | paper: Option 4 | baseline: option 4

question 8314 | Rel-17 | Standards specifications

Q: What does a '1' value for the Wake-up indication bit, when reported to higher layers, indicate? [3GPP Release 17]

Expected: option 4 | paper: Option 2 | baseline: option 2

question 8318 | Rel-18 | Standards specifications

Q: What is the purpose of the NWDAF in the charging architecture? [3GPP Release 18]

Expected: option 2 | paper: Option 3 | baseline: option 3

question 8361 | Rel-17 | Standards specifications

Q: What is the default media handling capability of the IMS Multimedia Telephony service? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 8364 | Rel-17 | Standards specifications

Q: What function in NG-RAN supports the positioning functionality? [3GPP Release 17]

Expected: option 4 | paper: Option 5 | baseline: option 5

question 8396 | Rel-17 | Standards specifications

Q: Where does AI/ML functionality reside within the current RAN architecture? [3GPP Release 17]

Expected: option 4 | paper: Option 3 | baseline: option 3

question 8405 | Rel-18 | Standards specifications

Q: What service does AF invoke to request the DNAI information? [3GPP Release 18]

Expected: option 4 | paper: Option 1 | baseline: option 1

Questions both runs miss (305-312 of 367)

question 8411 | Rel-18 | Standards specifications

Q: Which access control mechanism specifically applies to CSFB? [3GPP Release 18]

Expected: option 1 | paper: Option 3 | baseline: option 2

question 8426 | Rel-18 | Standards specifications

Q: What is the purpose of a Topological Service Area? [3GPP Release 18]

Expected: option 3 | paper: Option 5 | baseline: option 1

question 8460 | Rel-14 | Standards specifications

Q: What is the purpose of the DTX/DRX enhancements in CELL_FACH state? [3GPP Release 14]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 8499 | Rel-18 | Standards specifications

Q: Which reference channels are used to specify the radiated performance requirements for the SAN? [3GPP Release 18]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 8546 | Rel-17 | Standards specifications

Q: What causes the UE to fail the mobility from NR procedure? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 8598 | Rel-17 | Standards specifications

Q: What is the maximum number of UEs that an RSU can communicate with according to requirement R.5.1-022? [3GPP Release 17]

Expected: option 4 | paper: Option 2 | baseline: option 2

question 8638 | Rel-18 | Standards specifications

Q: What are the requirements for network and system selection for multi-mode terminals with 3GPP capability? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 4

question 8641 | Rel-17 | Standards specifications

Q: What is the purpose of exposing monitoring and status information of an AI-ML session to a third-party AI/ML application? [3GPP Release ...]

Expected: option 5 | paper: Option 3 | baseline: option 3

Questions both runs miss (313-320 of 367)

question 8665 | Rel-17 | Standards specifications

Q: How can the relay UE selection criteria preferences be configured in the Evolved ProSe Remote UE? [3GPP Release 17]

Expected: option 5 | paper: Option 4 | baseline: option 4

question 8672 | Rel-17 | Standards specifications

Q: Which function is responsible for supporting RNs? [3GPP Release 17]

Expected: option 1 | paper: Option 3 | baseline: option 3

question 8694 | Rel-18 | Standards specifications

Q: What are the two types of reference points for SAN type 1-H? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 8696 | Rel-17 | Standards specifications

Q: In a GERAN based MOCN configuration, when does a cell with closed/hybrid access need to coordinate the CSG IDs between the operators' ...

Expected: option 1 | paper: Option 2 | baseline: option 3

question 8703 | Rel-17 | Standards specifications

Q: What does a UE expect when it cancels a PUSCH or an SRS transmission? [3GPP Release 17]

Expected: option 1 | paper: Option 4 | baseline: option 4

question 8808 | Rel-17 | Standards specifications

Q: What is the reference point between the PDG and a packet data network? [3GPP Release 17]

Expected: option 5 | paper: Option 1 | baseline: option 1

question 8833 | Rel-17 | Standards specifications

Q: How are serving cells configured in terms of DRX groups? [3GPP Release 17]

Expected: option 3 | paper: Option 5 | baseline: option 2

question 8862 | Rel-17 | Standards specifications

Q: What is the characteristic of handover with SRVCC operation? [3GPP Release 17]

Expected: option 1 | paper: Option 2 | baseline: option 2

Questions both runs miss (321-328 of 367)

question 8885 | Rel-18 | Standards specifications

Q: What can be applied to a delay-scaled CDL model to model the effect of beamforming in a simplified way? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 2

question 8946 | Rel-17 | Standards specifications

Q: What does NG-RAN support for Non-Public Networks (NPN)? [3GPP Release 17]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 8962 | Rel-17 | Standards specifications

Q: What is the length of the window in number of slots for Type-2 random access procedure? [3GPP Release 17]

Expected: option 5 | paper: Option 2 | baseline: option 2

question 8965 | Rel-18 | Standards specifications

Q: What is the default Traffic type of interest if not provided? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 4

question 8981 | Rel-17 | Standards specifications

Q: What does the MME indicate to the UE in the GUTI? [3GPP Release 17]

Expected: option 5 | paper: Option 3 | baseline: option 1

question 9030 | Rel-17 | Standards specifications

Q: Who is responsible for the event-based or time-based decision process in order for all services to be regarded as periodic location ...

Expected: option 3 | paper: Option 2 | baseline: option 2

question 9046 | Rel-17 | Standards specifications

Q: What is the purpose of service reachability in the Evolved Packet System? [3GPP Release 17]

Expected: option 5 | paper: Option 4 | baseline: option 4

question 9048 | Rel-15 | Standards overview

Q: Which of the following solutions have been specified for providing highly reliable and low latency communication for LTE? [3GPP Release ...

Expected: option 3 | paper: Option 4 | baseline: option 1

Questions both runs miss (329-336 of 367)

question 9050 | Rel-18 | Standards specifications

Q: Which interface is used by NWDAF to request subscription to data delivery? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 3

question 9073 | Rel-17 | Standards specifications

Q: What network architecture should be supported? [3GPP Release 17]

Expected: option 3 | paper: Option 4 | baseline: option 4

question 9174 | Rel-17 | Standards specifications

Q: What is the maximum number of DL band combinations? [3GPP Release 17]

Expected: option 5 | paper: Option 128 | baseline: option 4

question 9219 | Rel-17 | Standards specifications

Q: What does the UE consider a DCI format 1_1 as indicating? [3GPP Release 17]

Expected: option 4 | paper: Option 3 | baseline: option 2

question 9237 | Rel-18 | Standards specifications

Q: In online charging with reservation, what happens if the resource usage execution fails? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 9264 | Rel-18 | Standards specifications

Q: What is the maximum allowable deviation from the manufacturer claimed EIRP level for a specific beam peak direction? [3GPP Release 18]

Expected: option 3 | paper: Option 2 | baseline: option 5

question 9268 | Rel-14 | Standards overview

Q: Which mechanism allows ProSe UE to UE communications for off-network operations in MC services? [3GPP Release 14]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 9277 | Rel-18 | Standards specifications

Q: What happens when the network cannot provide the required QoS for a data service? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 4

Questions both runs miss (337-344 of 367)

question 9305 | Rel-14 | Standards overview

Q: Which 3GPP specification specifies the User Equipment (UE) to V2X control function protocol aspects? [3GPP Release 14]

Expected: option 1 | paper: Option 3 | baseline: option 4

question 9317 | Rel-14 | Standards overview

Q: What standardized QCI values can be used for unicast delivery of V2X messages over LTE-Uu? [3GPP Release 14]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 9359 | Rel-18 | Standards specifications

Q: What type of analytics can NWDAF generate? [3GPP Release 18]

Expected: option 2 | paper: Option 5 | baseline: option 1

question 9394 | Rel-18 | Standards specifications

Q: What regulatory obligations can a Participating Operator have regarding PWS support? [3GPP Release 18]

Expected: option 1 | paper: Option 4 | baseline: option 4

question 9396 | Rel-17 | Standards specifications

Q: How does a UE determine the power for a PSCCH transmission in a PSCCH-PSSCH transmission occasion? [3GPP Release 17]

Expected: option 3 | paper: Option 4 | baseline: option 1

question 9400 | Rel-18 | Standards specifications

Q: What does the cell identity of the Primary cell in the Secondary RAN node indicate? [3GPP Release 18]

Expected: option 4 | paper: Option 5 | baseline: option 5

question 9507 | Rel-17 | Standards overview

Q: What is the purpose of the Target NSSAI for NG-RAN? [3GPP Release 17]

Expected: option 4 | paper: Option 2 | baseline: option 2

question 9511 | Rel-17 | Standards specifications

Q: Which organization is responsible for the development of the QuaDRiGa channel model? [3GPP Release 17]

Expected: option 5 | paper: Option 2 | baseline: option 2

Questions both runs miss (345-352 of 367)

question 9516 | Rel-17 | Standards specifications

Q: What is the purpose of PLMN selection in the UE? [3GPP Release 17]

Expected: option 4 | paper: Option 3 | baseline: option 3

question 9533 | Rel-18 | Standards specifications

Q: What is the purpose of UE categories in NR? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 9545 | Rel-18 | Standards specifications

Q: Can the home operator re-allow selection of a radio technology on a UE that has been previously disallowed? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 9557 | Rel-18 | Standards specifications

Q: How many lists of 3GPP PS Data Off Exempt Services can a UE be configured with? [3GPP Release 18]

Expected: option 1 | paper: Option 2 | baseline: option 2

question 9585 | Rel-17 | Standards overview

Q: How is PDCCH skipping configured for UE power saving in connected mode? [3GPP Release 17]

Expected: option 1 | paper: Option 4 | baseline: option 4

question 9595 | Rel-15 | Standards overview

Q: What is the purpose of the Quick release of RRC connection feature in NB-IoT? [3GPP Release 15]

Expected: option 5 | paper: Option 3 | baseline: option 3

question 9607 | Rel-18 | Standards specifications

Q: Which component invokes the Nnef_PFDManagement_Create/Update/Delete service? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 2

question 9612 | Rel-17 | Standards specifications

Q: When can the LCS server inform the target UE about the activation of Periodic Location Reporting? [3GPP Release 17]

Expected: option 4 | paper: Option 1 | baseline: option 1

Questions both runs miss (353-360 of 367)

question 9637 | Rel-18 | Standards specifications

Q: What is the role of NF Sets in network reliability? [3GPP Release 18]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 9641 | Rel-18 | Standards specifications

Q: How does the DCCF determine the NF instance that can be a Data Source? [3GPP Release 18]

Expected: option 3 | paper: Option 1 | baseline: option 1

question 9674 | Rel-18 | Standards specifications

Q: Which test system is impacted by off-focus antenna? [3GPP Release 18]

Expected: option 3 | paper: Option 4 | baseline: option 2

question 9707 | Rel-18 | Standards specifications

Q: Is the user able to re-enable use of a radio technology on a UE that has been previously disallowed? [3GPP Release 18]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 9710 | Rel-17 | Standards specifications

Q: Is a subscription profile necessary for certain authorized LCS Clients internal to the PLMN? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 1

question 9738 | Rel-18 | Standards specifications

Q: What type of frequency hopping can improve positioning performance for RedCap UEs in FR2 InF-SH scenario? [3GPP Release 18]

Expected: option 2 | paper: Option 3 | baseline: option 3

question 9777 | Rel-18 | Standards specifications

Q: What does a Multi-USIM UE do when it receives a Voice Service Indication in the NGAP Paging Message from the AMF? [3GPP Release 18]

Expected: option 4 | paper: Option 2 | baseline: option 2

question 9781 | Rel-16 | Standards specifications

Q: Which relaxation criteria should be treated with higher priority in RRM measurement relaxation? [3GPP Release 16]

Expected: option 3 | paper: Option 1 | baseline: option 1

Questions both runs miss (361-367 of 367)

question 9791 | Rel-17 | Standards specifications

Q: According to the document, how should the behaviour of IMS supplementary services be perceived by the user? [3GPP Release 17]

Expected: option 2 | paper: Option 1 | baseline: option 3

question 9836 | Rel-17 | Standards specifications

Q: What does GLR stand for? [3GPP Release 17]

Expected: option 5 | paper: Option 3 | baseline: option 3

question 9889 | Rel-17 | Standards specifications

Q: When can a UE receive multiple PDCCHs indicating the presence of TRS resource sets? [3GPP Release 17]

Expected: option 3 | paper: Option 5 | baseline: option 4

question 9894 | Rel-17 | Standards specifications

Q: Which scenario is characterized by high requirements on the communications system regarding communication service availability? [3GPP ...]

Expected: option 4 | paper: Option 5 | baseline: option 3

question 9944 | Rel-17 | Standards specifications

Q: What does the Ethernet transport service support in terms of traffic filtering and prioritization? [3GPP Release 17]

Expected: option 2 | paper: Option 4 | baseline: option 4

question 9974 | Rel-18 | Standards specifications

Q: What is the purpose of Analytics/ML Model Accuracy Monitoring? [3GPP Release 18]

Expected: option 3 | paper: Option 2 | baseline: option 2

question 9999 | Rel-17 | Standards specifications

Q: What are the physical-layer cell identities for 5G NR? [3GPP Release 17]

Expected: option 4 | paper: Option 2 | baseline: option 2
